# IDAHO PRIDE

**When you live, fish and work in the center of the trout universe, actually making it to work can be tough.** Unless your job is at RIO, where fishing and work are often one and the same. From mountain-freestone cutthroat and Snake River steelhead to the highly educated rainbows and browns of Silver Creek and the Henry's Fork, our state waters are the laboratory where great fly lines are born.

Of course, we have to travel for work, too. Which means fanning out around the globe to wade tropical flats, swing Spey rods in BC, chuck poppers into pads, sling Clousers through rips, jump tarpon in the Keys, and venture out to sea for blue-water giants... All in the name of research and development, of course.

But we always return home to where it all started: Idaho. It's here that we put everything we learn on the water into our products. It's here that we test new ideas, taper designs, and materials in our never-ending quest to better connect anglers and fish. And it's here that we proudly build the finished fly lines we send out into the world, from Idaho, with love.

# 2017 HIGHLIGHTS

## NEW PRODUCTS:

- CamoLux Intermediate line; WF3I to WF8I (p.14)
- InTouch Trout/Steelhead Indicator; WF4F to WF8F (p.14)
- InTouch Big Nasty; WF6F to WF10F (p.17)
- Suppleflex Leaders, 12ft; 6X to 3X (p.23)
- Suppleflex Leaders, 7.5ft; 6X to 3X (p.23)
- Summer Redfish; WF6F to WF10F (p.33)
- Winter Redfish Line; WF8F to WF10F (p.38)
- Coastal Seatrout WF; WF5 to WF8 Float and Float/Hover (p.38)
- Coastal QuickShooter; WF5I to WF8I (p.39)
- Coastal QuickShooter XP; WF8I to WF10I (p.39)
- Saltwater Mono; 8lb to 60lb (p.48)
- InTouch MidHead Spey; 6/7F to 10/11F (p.64)
- Powerflex Max Shooting Line; .024" to .040" (p.67)
- RIO's Favorite Fly Fishing Knots DVD (p.74)
- RIO Sun Mask (p.75)

## CATEGORY ADDITIONS

- InTouch Single Handed Spey Line; WF3F
- RIO Scandi; 610gr
- Saltwater leaders; 25lb, 30lb, 40lb
- Redfish/Seatrout leaders; 25lb, 30lb
- Striped Bass leaders; 25lb, 30lb
- Powerflex Plus Tippet, 3-pack
- Fluoroflex Plus Tippet, 3-pack
- Steelhead/Salmon Tippet, 3-pack
- Tarpon Pro Leader; 40lb

## IMPROVEMENTS/CHANGES

- Toothy Critter leader - Increased leader strength in heavier wire sizes
- Pike/Musky leader - Increased leader strength in heavier wire sizes

# RIO TECHNOLOGIES

## ConnectCore

When you rely on feel to know what's going on, line stretch is the enemy. Our ConnectCore lines open up new worlds of perception and sensitivity with ultra-low stretch performance providing a new level of feel for better, more instinctive casting, longer pick ups and more precise mends. Soft, subtle takes become positive grabs, and without stretch to dull reaction times, hook sets are immediate and sure. ConnectCore. The secret weapon for instant success.

## MaxFloat Tip

Tired of floating lines that work like sinktips? Fact is, the reduced coating at the narrow, tapered end of most floating lines doesn't have enough buoyancy to stay above water. MaxFloat Technology solves this age-old problem. Our proprietary tip coating formula floats more than twice as high as regular line tips, without any increase in diameter. That puts maximum floatation right where you need it for reduced drag, longer presentations and quieter pickups.

## MaxCast

Made with a groundbreaking proprietary formula, MaxCast lines float higher, shoot farther, last longer and stay cleaner. The secret? MaxCast's hydrophobic chemistry, which actively pushes water away from the line, resulting in radically improved floatation and reduced dirt adhesion. It also allows the line to slip more easily from the surface film for longer, quieter pickups. At the same time, MaxCast's coating formulation contains a sophisticated blend of permanent slickening agents, and slickening agents that continuously migrate to the line's exterior for enhanced shooting and durability.

## Agent X

Traditional, single-layer fly lines have to compromise between function and the need for durability and slickness. AgentX Technology makes the old compromise obsolete by bonding two separate coating layers onto one line. This proprietary process allows RIO line designers to optimize the specific performance of each line. For example, AgentX floating lines can use an inner layer with more buoyant microspheres, while the outer layer is formulated for maximum toughness and shooting ability. AgentX means the best of both worlds in a single fly line.

## Extreme Slickness

Extreme Slickness Technology began when RIO's chemists began reformulating conventional chemical combinations. Although RIO's formulas were great, our scientists are fly fishers, and by definition they want an even slicker fly line - it's just part of the deal. So first, they tackled the polyvinyl chloride (PVC) coating and through intense scrutiny down to the polymeric mix level, (say that 10 times fast) they defined some fundamental limitations. Out went the old PVC/silicone formulas and by methodically adding a little more of this, a little less of that, and a pinch of secret sauce, the lab coats cooked up a completely new and improved recipe. With Extreme Slickness Technology, RIO has developed a fly line that is slicker, more stable, far less apt to attract dirt, and offers more consistent performance cast after cast, strike after strike, fish after fish.

## FEATURES

**SUREFIRE** is our exclusive, triple color marking system that improves casting accuracy by making it easy to gauge exact distances with a quick glance.

**DUALTONE** is a system perfected by RIO that marks the sweet spot of a fly line by providing an obvious color change in the line. With the DualTone system it is easy to see how much line to strip in, where to pick up a cast, how much line can be held in the air when false casting, and when to make the final cast.

**DENSITY COMPENSATION** adds a more dense material to the thin tip of a sinking line (or sink tip), which ensures the line sinks straight - better for knowing when a fish takes the fly, and far better for setting the hook.

**FRONT & BACK WELDED LOOP** A neat, bullet-proof welded loop on the end for fast rigging.

**HANG MARKER** A highly visible, short mark built into the fly line that shows anglers when the end of the sinking line is getting close during the retrieve. For anglers that fish the "hang" this is invaluable.

**EASY ID** RIO's printed line marking system to allow anglers to quickly and easily identify each line.

**LOADING POINT** An easy to see reference point that shows the most efficient loading point of the fly line.

# FRESHWATER

FLY LINES

# SOMETIMES YOU HAVE TO GET DOWN AND DIRTY

## **Introducing InTouch Big Nasty and InTouch Trout/Steelhead Indicator Lines**

It's not all 6X and #22 tricos out there these days. Nope. If you want consistent success, sometimes you gotta suck it up and go industrial strength. Articulated sculpins. Lead-eye woolly buggers. Hoppers-and-droppers. Beads and indicators. Effective? Absolutely. But getting the heavy stuff out there is enough to make your casting arm shake...unless you fish our newest freshwater lines.

The **InTouch Big Nasty** makes casting easy when you have to up the ante. It's specifically designed with a short, powerful front taper to handle weighted streamers and big, wind-resistant terrestrials. The heavier-than-industry-standard weight loads modern rods fast, and punches bulky bugs into the wind. Big and nasty? Pretty much describes the line, the flies, and the fish you'll hook.

Our new **InTouch Trout/Steelhead Indicator** line takes the chuck-n-duck out of indicator fishing. Its short, powerful front taper provides easy distance and accuracy to put egg patterns, beads, and weighted nymphs right into the slot. The long rear taper means superior control and easy mending to keep it all drag free—even on the far side. In other words, don't fear the indicator. Embrace it.

## Trout Series InTouch RIO Perception

### TECHNOLOGY:

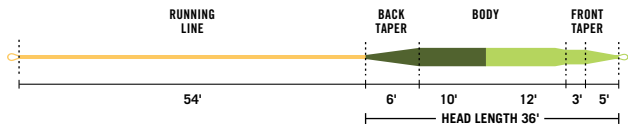

- ConnectCore
- MaxFloat Tip
- MaxCast
- AgentX

### FEATURES:

- SureFire
- EasyID
- Front Loop
- Back Loop

### InTouch RIO Perception

Example: WF5F  
Overall Length: 90'

### UNPRECEDENTED CASTING CONTROL and instantaneous feel. The trout line redefined.

- Short, easy casting head—ideal on smaller waters and for less experienced casters
- Reduced weight front end for smooth loops and great presentations
- ConnectCore improves cast timing, hook sets and mending
- EasyID to quickly identify fly line

THE RIO PERCEPTION is an excellent all round, general purpose fly line that is suitable for casting most nymphs, streamers, dry flies and soft hackles. The line has a short head, and a short front taper that makes it ideal for smaller rivers and stillwaters. The line is built with RIO's ultra-low stretch ConnectCore for the minimum in stretch and the maximum in performance, and features RIO's MaxFloat Tip, MaxCast and Agent X Technologies for ultimate performance. Welded loops in each ends for speedy rigging, RIO's unique triple colored "SureFire" distance and accuracy marking system, and RIO's "Easy ID" line identification printing, ensures this line has everything to enhance the fly fishing experience.

- MaxCast
- AgentX

### FEATURES:

- SureFire
- EasyID
- Front Loop
- Back Loop

### InTouch RIO Gold

Example: WF5F  
Overall Length: 90'

### THE ULTIMATE, ALL-ROUND fly line, with ultra-low stretch performance.

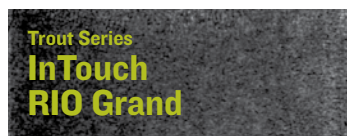

- Perfect presentation of flies between #2 and #22
- ConnectCore improves cast timing, hook set and mending
- Unique SureFire color system for improved accuracy and distance control
- Easy ID to quickly identify fly line

THE INTOUCH RIO GOLD has a taper design that gives incredible loop stability at distance and a front taper that delivers perfect presentation of flies between sizes #2 and #22. The ultra-low stretch ConnectCore provides groundbreaking levels of sensitivity for intuitively better cast timing, easier line lift and sharp, precise mends. Lack of stretch also means enhanced detection of subtle takes and faster reaction time when setting the hook. The long head is ideal for the river fly fisher, and for controlling the fly at range.

#### InTouch RIO Grand

Example: WF5F  
Overall Length: 90'

**DESIGNED FOR FAST-ACTION** fly rods, with ultra-low stretch performance.

- Easily loads fast action rods
- ConnectCore improves cast timing, hook set and mending
- One full line size heavier than industry standard
- Easy ID to quickly identify fly line

THE INTOUCH RIO GRAND is a full line size heavier than the industry standard, and features more weight distributed towards the front of the line to easily load faster action fly rods. The ultra-low stretch ConnectCore provides groundbreaking levels of sensitivity for intuitively better cast timing, easier line lift and sharp, precise mends. Lack of stretch also means enhanced detection of subtle takes and faster reaction time when setting the hook. The InTouch RIO Grand is the best choice of line for the modern, fast action fly rod.

Overall length: 27,3 m (90')

Example: WF6F

A Perfectly balanced fly line designed for Scandinavian conditions and both over- and underhand casting. The unique taper makes the line easy to lift from the water and perfect for underhand casts from "impossible" positions. The olive colored 9' (2.7 m) non-spook tip will help you catch fish even in gin-clear water. This is a great line for delicate presentations with excellent precision. The Dart line comes with an AFTM classification marking printed on the tip for easy recognition.

### InTouch Trout LT DT

Example: DT5F  
Overall Length: 90'

**THE ULTIMATE LINE FOR** delicate presentation, with ultra-low stretch performance.

- Long, fine tapers for soft presentation
- ConnectCore improves cast timing, hook set and mending
- Perfect for soft hackles, and small dry flies
- Easy ID to quickly identify fly line

THE INTOUCH TROUT LT (Light Touch) line is available in both double taper, and weight forward profiles, and features a long, fine front taper for the lightest of presentations and perfect roll casts. The ultra-low stretch ConnectCore provides groundbreaking levels of sensitivity for intuitively better cast timing, easier line lift and sharp, precise mends. Lack of stretch also means enhanced detection of subtle takes and faster reaction time when setting the hook. The InTouch Trout LT is perfect for fishing dry flies, nymphs and emergers.

### THE ULTIMATE, ALL-ROUND floating line for trout

- Incredible loop stability and distance
- Unique taper that easily loads a fly rod at close range
- Perfect presentation of flies between #22 and #2

THE RIO GOLD has a special taper design that gives incredible loop stability at distance, a unique profile that allows a rod to load at close range and a front taper that delivers perfect presentation of flies between sizes #22 and #2. The RIO Gold is the ultimate all round, floating line for the trout fly fisher.

This line is also available in two unique color options. A bright, highly visible orange option is an ideal line color for anglers that like to see their line easily when casting and fishing. In addition, it is an excellent color for teaching (or learning) with, and great for casting demonstrations and for shooting videos or photos with.

The Lumalux color is a unique line that can be charged with a bright light source, allowing it to clearly glow in the dark. It is a great line for hex hatches, night fishing and for night casting games!

All proceeds from sales of the Pink RIO Gold go to Casting for Recovery.

The RIO Gold Tournament version of this line is designed for long distance casting events, and features an extra-long head for maximum distance.

## Trout Series RIO Grand

### TECHNOLOGY:

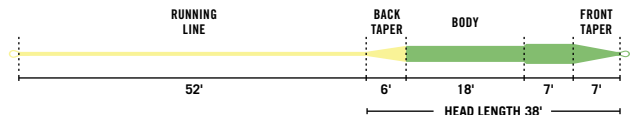

- MaxFloat Tip
- MaxCast
- AgentX

### FEATURES:

- DualTone
- Front Loop
- Back Loop

### RIO Grand

Example: WF5F  
Overall Length: 90'

### DESIGNED FOR fast-action fly rods

- Easily loads fast action fly rods
- Heavier than the industry standard
- Short head for quick loading

THE RIO GRAND is a full line size heavier than the industry standard, and features more weight distributed towards the front of the line to easily load faster action fly rods. The line has a short head that is easy to cast, and is built with "MaxCast" Technology, RIO's ultra-sophisticated line coating that actively repels water for higher floatation, longer casts and greater durability. The RIO Grand is the best choice of line for the modern, fast action fly rod.

### THE ULTIMATE LINE FOR dry flies, emergers and subtle presentations

- Long, fine tapers for the gentlest in presentation
- Rear biased weight distribution – perfect for roll and single handed spey casting
- Extra supple coating

THE TROUT LT (Light Touch) line is available in both double taper, and weight forward profiles, and features a long, fine front taper for the lightest of presentations. Both the WF and DT versions of this line are designed specifically with the single handed roll and Spey caster in mind, and perform these extremely handy casts with the utmost of ease. This extra supple line features “MaxFloat Tip” – RIO’s proprietary tip coating formula that floats more than twice as high as regular floating lines, and is perfect for fishing dry flies, nymphs and emergers.

## Specialty Series LightLine

### TECHNOLOGY:

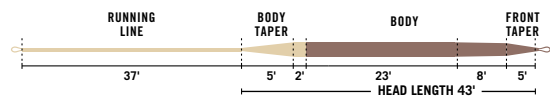

- MaxCast
- MaxFloat Tip
- AgentX

### FEATURES:

- DualTone
- Front Loop
- Back Loop

### LightLine WF

Example: WF5F  
Overall Length: 80'

### LightLine DT

Example: DT5F  
Overall Length: 80'

### DESIGNED FOR SLOWER ACTION RODS; especially bamboo, glass and “classic” action graphite rods

- Short front taper and weight distribution makes it ideal for creeks
- Perfect for bamboo, glass and softer graphite fly rods
- MaxFloat Tip and MaxCast technologies for the very best in performance
- Extra-supple coating for minimal coiling and relaxed performance

RIO'S LIGHTLINE has been designed to load slower, more traditional action fly rods such as bamboo, glass and the more “Classic” flexing graphite rods. Built to precisely match the industry line standards, this line will not overload such rods – even at longer range. The weight distribution and short front taper ensures the line loads at close range, making it ideal for fishing on smaller creeks and streams, while the softer, supple coating ensures the line remains relaxed and easy to handle in the majority of conditions.

#### THE BEST SINKING TIP fly line series in the world, with ultra-low stretch performance.

- Ultra-low stretch ConnectCore for maximum performance
- Easy casting body section eliminates the characteristic "kick"
- Aggressive front taper easily cast large streamers
- Density Compensated tip for fly control
- Smooth casting tapers, that are easy to cast

Built with RIO's ultra-low stretch ConnectCore Technology. A series of sinking tip lines specifically built for anglers that like a balanced casting rig. A unique, fatter body section eliminates the "kick" usually associated with casting sink tip lines; while the longer front tapers ensure the line does not dump on the forward cast. The supple floating body section allows anglers to easily mend and control the way the fly fishes, making it ideal for river anglers. Each line has a welded loop on the front end for easy rigging.

## Sink Tip Series InTouch StreamerTip

### TECHNOLOGY:

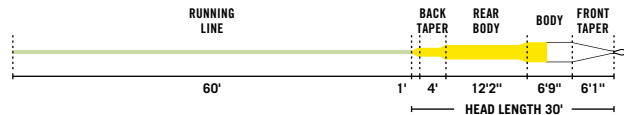

- ConnectCore
- Extreme Slickness

### FEATURES:

- Density Compensation (Sink 6 Only)
- DualTone
- Front Loop

### InTouch StreamerTip

Example: WF8F/I  
Overall Length: 90'

**THE ULTIMATE RANGE OF** sink tip lines for throwing streamers, with ultra-low stretch performance.

- Built with ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance
- Short, powerful head to load at close range
- Aggressive front taper easily cast large streamers
- Welded loops for superfast rigging

A series of lines with short, 10 ft sinking tips, specifically built for fly fishers that like to fish streamers out of a boat. A short, heavy head loads rods at close range, allowing anglers to make fast, one-shot casts. An aggressive, powerful front taper casts large conehead muddlers and bunny leech rigs with ease, while a welded loop on the front end allow anglers to change rigs quickly. Built with RIO's ultra-low stretch ConnectCore Technology and a supple coldwater coating, this line will not tangle off the reel.

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
InTouch StreamerTip F/I						
RP20821	WF5F/I	30ft / 9.1m	12,0g	90ft / 27.4m	Float / 1.5ips	Gray / Yellow / Pale Green
RP20822	WF6F/I	30ft / 9.1m	13,6g	90ft / 27.4m		
RP20823	WF7F/I	30ft / 9.1m	15,6g	90ft / 27.4m		
RP20824	WF8F/I	30ft / 9.1m	18,1g	90ft / 27.4m		
InTouch StreamerTip F/S6						
RP20825	WF5F/S6	30ft / 9.1m	12,0g	90ft / 27.4m	Float / 6ips	Black / White / Pale Green
RP20826	WF6F/S6	30ft / 9.1m	13,6g	90ft / 27.4m		
RP20827	WF7F/S6	30ft / 9.1m	15,6g	90ft / 27.4m		
RP20828	WF8F/S6	30ft / 9.1m	18,1g	90ft / 27.4m		

Two different tip densities are available; the F/I has an intermediate tip that sinks about 1.5in per second, and is great for throwing streamers to the bank. The fast sinking type 6 tip sinks about 6in per second and is ideal when fast depth is required.

## Sink Tip Series InTouch VersiTip II

### TECHNOLOGY:

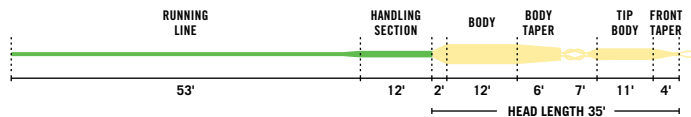

- ConnectCore
- AgentX
- Extreme Slickness

### FEATURES:

- Density Compensation (S3 & S6 only)
- DualTone
- Front Loop

### InTouch VersiTip II

Example: WF8  
Overall Length: 100'

**A POWERFUL, INTERCHANGEABLE** tip fly line, with ultra-low stretch performance.

- Built with ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance
- Powerful, easy casting design makes distance easy
- Supplied with a selection of interchangeable tips
- Welded loops on both ends of each tip for fast rigging

RIO'S INTOUCH VERSITIP II is a powerful, easy casting interchangeable tip fly line designed for the traveling angler. Built with RIO's ultra-low stretch ConnectCore Technology, each line comes with a selection of interchangeable tips that allow anglers to switch tips as fishing and water conditions change. A unique mending and handling section at the back end of the head enables anglers to mend effectively and control the way the fly fishes at range. Ultra strong, slim welded loops on both ends of each tip makes for super-fast rigging.

Each line is packaged with four 15ft tips:

- Floating – F
- Intermediate (1.5 – 2ips) – I
- Type 3 Sink (3 – 4ips) – S3
- Type 6 Sink (6 – 7ips) – S6

## Lake Series InTouch Sinking Lines

### TECHNOLOGY:

ConnectCore

### FEATURES:

- Density Compensation
- Hang Marker
- Front Loop

with Density Compensation

without Density Compensation

### InTouch Deep 6

Example: WF7S6  
Overall Length: 100'

### THE MOST INCREDIBLY ADVANCED range of sinking lines ever made

- Ultra-low stretch core for the ultimate in sensitivity and hook setting capability
- Powerful, front loaded head for easy casting and maximum distance
- Density Compensated for perfect fly control

A complete series of full sinking lines developed for the lake angler and packed with the very finest benefits that increase fish catches. A powerful head loads up the rod from the first cast, while welded loops on the front end allow anglers to change rigs quickly. RIO's ultra-low stretch ConnectCore results in fantastic sensitivity for detecting the softest take, and a unique "hang marker" shows anglers when to stop stripping and to fish the "hang".

Four different sink rate options allow anglers to cover the depths. The slow sinking Deep 3 sinks between 3-4 ips, and is ideal for fishing between 3 and 7 feet in depth. The medium sinking Deep 5 sinks between 5-6 ips, and is best for fishing between 5 and 10 feet in depth. The fast sinking Deep 6 sinks between 6-7 ips, and is a great line for fishing between 8 and 15 feet in depth, and the super-fast sinking Deep 7 sinks between 7-8 ips, and is the best choice when real depth is required, and anglers need to fish their flies between 12 and 30 feet in depth.

For further details about these incredible sinking lines, watch the short video at <http://vimeo.com/41373906>

## WHEN YOU RELY ON TOUCH TO KNOW WHAT'S GOING ON IN THE DEPTHS, LINE STRETCH IS THE ENEMY.

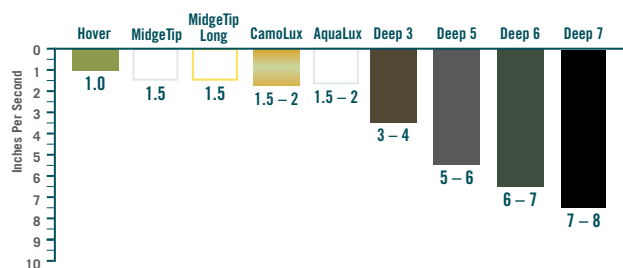

Our ConnectCore full sinking lines open up new worlds of perception and sensitivity with ultra-low stretch performance. Soft, subtle takes become positive grabs, and without stretch to dull reaction times, hook sets are instant and sure. ConnectCore, the secret weapon for stillwater success.

### THE MOST INCREDIBLY ADVANCED range of sub-surface lines ever made.

- Ultra-low stretch ConnectCore for the ultimate in sensitivity and lightning fast hook sets
- Hang Marker helps indicate when to cast
- Short, front loaded head for easy casting and maximum distance

RIO'S INTOUCH SUB-SURFACE lines are built on an ultra-low stretch core for incredible sensitivity to the take and lightning-fast hook sets. A range of densities ensure anglers are covered for all fishing situations and conditions, and the supple core and coating keeps the lines relaxed and tangle-free. A hang marker (not on MidgeTip Long) helps anglers gauge when to cast or when to fish the "hang" and a welded loop in the front end allows for fast rigging.

The ultra-slow sinking hover line sinks at less than 1' per second and is a fantastic line for fishing just under the surface, particularly on windy days when a floating line is difficult to control.

### A FANTASTIC RANGE OF sub-surface fly lines designed for the lake angler

- Powerful, front loaded head for easy casting and maximum distance
- Range of densities – perfect for fishing in the top layers of the water column
- Unique taper profiles, custom designed for each line

The most effective fish catching zone in the majority of lakes is within the top 6 feet of the water column. RIO's Sub-surface lake lines are deadly effective on windy days and when fishing in shallow bays, close to lake shores and over the top of weed beds. Each line is built with a supple coldwater core and coating and features a welded loop in the front end for fast rigging.

Overall Length: 100'

### DESIGNED TO CAST INDICATOR RIGS with ease – perfect for the trout and steelhead angler

- Powerful front taper to cast indicator rigs
- Ultra-low stretch ConnectCore for maximum performance
- Long rear taper and head for mending and line control
- Supple, coldwater coating ensures no memory off the reel

THE INTOUCH TROUT/STEELHEAD INDICATOR line is designed for the river fly fisher that likes to fish indicator rigs with control and at long range. The line features a powerful front taper that has no problem turning over indicators, and a long body and back taper for stability at range, and for ease of mending. The line is built on RIO's ultra-low stretch ConnectCore for the minimum of stretch and the maximum in performance, and features RIO's SureFire, XS and AgentX Technologies.

Overall Length: 100'

### AN INCREDIBLY ADVANCED NYMPHING LINE, ideal for fishing indicators out of a boat

- Ultra-low stretch ConnectCore for maximum performance
- Short, easy loading head to throw all manner of indicator rigs
- Perfect for fishing out of a boat

The InTouch Xtreme Indicator line has been designed to be a very effective tool for anglers that fish nymphs and indicators out of a boat. The short head has a powerful front taper that casts indicator rigs with ease, and loads up with a single cast. Built with RIO's ultra-low stretch ConnectCore Technology, the line allows for intuitively better cast timing, easier line lifts and sharp, precise mends. Lack of stretch also means faster reaction time when setting the hook.

## Specialty Series InTouch Single Handed Spey

### TECHNOLOGY:

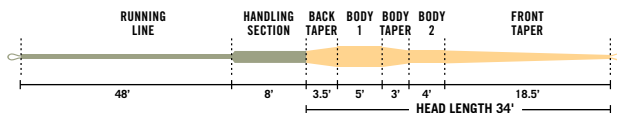

- ConnectCore
- MaxCast
- AgentX

### FEATURES:

- DualTone
- Front Loop
- Back Loop

## InTouch Single Handed Spey

Example: WF5F  
Overall Length: 90'

### THE PERFECT LINE FOR ROLL, and single handed Spey casts

- Incredibly easy roll and overhead casting line design
- Ultra-low stretch core for maximum performance
- DualTone system to easily identify loading area
- Thick handling section lengthens out the head for stability and control

THE INTOUCH SINGLE HANDED SPEY line has been designed to be a fantastic tool for anglers that prefer/need to perform roll and single-handed Spey casts. The rear weight distribution loads a rod deeply in the tightest of quarters,

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
<b>InTouch Single Handed Spey</b>						
RP20657	WF3F	33ft / 10m	9,7g	80ft / 24.4m	Float	Peach / Camo
RP20656	WF4F	33ft / 10m	11,3g	90ft / 27.4m		
RP20646	WF5F	33ft / 10m	13,0g	90ft / 27.4m		
RP20647	WF6F	33ft / 10m	14,9g	90ft / 27.4m

RP20649	WF8F	33ft / 10m	19,4g	90ft / 27.4m		

allowing anglers to make long, effortless casts with obstacles close behind. Though primarily designed for roll casting, this line also performs exceptionally easy overhead casts with incredibly smooth loop control. Built on RIO's ultra-low stretch ConnectCore the line provides groundbreaking levels of sensitivity and performance.

## Specialty Series InTouch Salmo / Steelhead

### TECHNOLOGY:

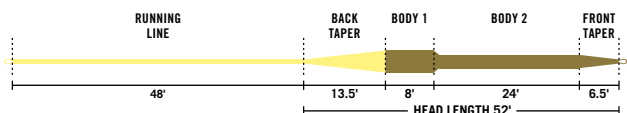

- ConnectCore
- AgentX
- Extreme Slickness

### FEATURES:

- DualTone
- Front Loop
- Back Loop

## InTouch Salmo / Steelhead

Example: WF8F  
Overall Length: 100'

### SPECIFICALLY DESIGNED FOR THE DEMANDS of the steelhead and salmon fly fisher

- Ultra-low stretch ConnectCore for maximum sensitivity and performance
- Bullet front taper to cast typical steelhead and salmon flies
- Long head for great fly control & mending ability
- XS Technology for a superslick coating
- Welded loops for fast rigging

RIO'S INTOUCH SALMO/STEELHEAD line has been specifically designed to meet the demands of the modern steelhead and salmon fly fisher. The long head and rear taper allow anglers to mend and control the fly at great distance when fishing the swing. A powerful bullet front taper ensures

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
<b>InTouch Salmo / Steelhead</b>						
RP20215	WF6F	52ft / 15.8m	18,5g	100ft / 30.5m	Float	Moss / Yellow
RP20216	WF7F	52ft / 15.8m	20,5g	100ft / 30.5m

- AgentX
- Extreme Slickness

### FEATURES:

- Front Loop
- Back Loop
- DualTone

## InTouch Pike / Musky

Example: WF11F  
Overall Length: 100'

### SPECIFICALLY DESIGNED FOR the demands of the Pike/Musky fly fisher

- Ultra-low stretch ConnectCore for maximum sensitivity and performance
- Short, powerful front taper to easily cast typical streamers
- Heavier than the AFTMA standard to load powerful rods

RIO'S INTOUCH PIKE/MUSKY line has been specifically designed to meet the requirements of the modern pike and musky fly fisher. It features a short head and a powerful front taper that has no problem casting the biggest of streamers. The line is heavier than the industry standard to load powerful rods with ease, and is built with a supple, coldwater coating that features RIO's XS and AgentX technologies for the very best in performance. A range of densities are available to cover a multitude of conditions. Built with ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance.

- Extreme Slickness

### FEATURES:

- Density Compensation (Sinking Lines Only)
- DualTone
- Front Loop
- Back Loop

### InTouch OutBound Short

Example: WF8F  
Overall Length: 100'

**EXCEPTIONALLY POWERFUL, EASY CASTING**, line built for maximum distance, with ultra-low stretch performance

- Ultra-low stretch ConnectCore for maximum performance
- Front loaded to cast large flies with ease
- Designed for easy distance
- XS Technology for a superslick coating
- Welded loops for fast rigging

RIO'S INTOUCH OUTBOUND SHORT series of lines are designed to cast large and heavy flies very long distances. Built with RIO's ultra-low stretch ConnectCore Technology. A short, aggressive front taper easily carries large, weighted streamers, while the powerful head design loads rods deeply and efficiently for effortless casts. A full range of densities make this a very versatile line series. Each line features RIO's XS Technology for super slick performance, and is built with a supple, coldwater coating that ensures the line remains tangle-free.

## Specialty Series InTouch Big Nasty

NEW!

### TECHNOLOGY:

- ConnectCore
- Extreme Slickness
- AgentX

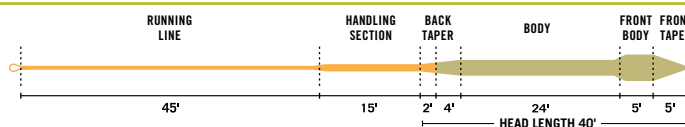

### FEATURES:

- DualTone
- Front Loop
- Back Loop

### InTouch Big Nasty

Example: WF8F  
Overall Length: 100'

**DESIGNED TO CAST LARGE** and heavy flies with exceptional ease

- Short, powerful front taper to cast large and heavy flies
- Ultra-low stretch ConnectCore for maximum performance
- Heavier than the industry standard to load easily
- Supple, coldwater coating ensures no memory off the reel

THE INTOUCH BIG NASTY is designed specifically to cast large and heavy flies with exceptional ease. The line features a short, powerful front taper that has no problem casting weighted streamers and large terrestrial patterns, and is heavier than the industry standard to load modern rods quickly. The line is built on RIO's ultra-low stretch ConnectCore for the minimum of stretch and the maximum in performance, and features RIO's XS and AgentX technologies, as well as welded loops on both ends.

## Specialty Series FIPS Euro Nymph

### TECHNOLOGY:

Extreme Slickness

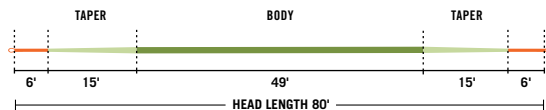

### FEATURES:

- Front Loop
- Back Loop

### FIPS Euro Nymph

Example: #2-5  
Overall Length: 80'

### THE PERFECT LINE FOR CZECH, Polish and French style nymphing

- Ultra-thin, incredibly light line for the utmost in sensitivity
- Highly visible tip for detecting the subtlest of takes
- Approved & endorsed by FIPS Mouche as "Competition Legal"
- Low-stretch core

RIO'S EURO NYMPH line has been thoroughly vetted and approved by FIPS Mouche as "Competition Legal". A system of special marks on the line has been endorsed and approved by FIPS Mouche, ensuring that competitive anglers do not have to waste valuable fishing time by having their line checked during competition hours.

The Euro Nymph line was designed by Steve Parrot to satisfy the need for a one size fits all European style nymphing line that is competition legal. The line is built on a thin diameter, low stretch, supple core to maximize sensitivity and allow for lightning fast hook sets, while a highly visible tip helps anglers detect the slightest of strikes. This line is designed specifically for European style nymphing techniques, such as "French", "Czech", "Polish" and "Spanish" styles.

## Specialty Series Smallmouth Bass

### TECHNOLOGY:

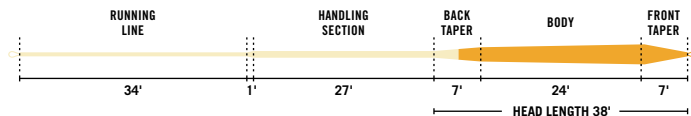

AgentX  
Extreme Slickness

### FEATURES:

- DualTone
- Front Loop
- Back Loop

### Smallmouth Bass

Example: WF7F  
Overall Length: 100'

### SPECIFICALLY DESIGNED FOR the demands of the bass fly fisher

- Powerful front taper that cast Clousers and bass bugs with ease
- Unique "handling" section for perfect fly control
- Hard coating that will not wilt in summer heat

RIO'S SMALLMOUTH line has been specifically designed to meet the demands of the modern bass fly fisher. The weight distribution and powerful front taper easily casts typical Clouser and Bass bug flies, while a unique handling section at the back of the head allows anglers to mend and control the fly effectively. The line is built with a hard, warm water coating that with stands typical summer heat, and ensures the line shoots through the guides with ease.

## Avid Series Trout

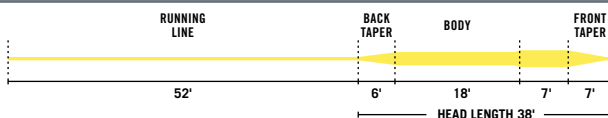

TECHNOLOGY:  **AgentX**  
 **Extreme Slickness**

FEATURES:  **Front Loop**  
(WF Floating Only)

### Avid Trout Weight Forward

Example: WF5F  
Overall Length: 90'

### Avid Trout 24ft Sink Tip

Example: 150gr  
Overall Length: 90'

### DEVELOPED WITH TAPERS and technology that enhance the fly fishing experience

- Slightly heavier, easy casting lines for a multitude of situations
- Short, powerful front taper for good presentation and turnover
- Welded loop on the front end to allow for fast and easy rigging

RIO's Avid series of fly lines were developed for the keen fly fisher with tapers and technology that enhance the fly fishing experience. The lines are designed for easy casting performance, with slightly heavier and shorter head lengths. Each line is built on a supple memory-free core, and has a super slick coating for easy distance. A welded loop on the front end allows anglers to rig easily (not on sink tips).

## Mainstream Series Bass

### Mainstream Bass

Example: WF9F  
Overall Length: 80'

### TARGETED TO THE OVERALL needs of the average fly fisher

- Slightly heavier, easy casting lines for a multitude of situations
- Short, powerful front taper for good presentation and turnover

RIO'S MAINSTREAM BASS fly lines have been developed to meet the overall needs of the average and novice fly fisher, and are designed to optimize rod performance with slightly heavier and shorter head lengths. Every Mainstream line undergoes the same rigorous production processes and quality control standards as all RIO fly lines, and is made in RIO's Idaho manufacturing facility. Each bass line is built with a warm water coating over a supple memory-free core, for the best in performance.

## LEADERS

Specialty Series  
**Powerflex® Plus**  
Tapered Leader

**POWERFLEX PLUS TROUT LEADERS** are the strongest trout leaders ever made, with tensile strengths up to 20% more than regular leaders. A technical modification of the nylon copolymer formulation has resulted in prodigious strength increase, without compromising the knot strength or suppleness. Simply put, these are the strongest, most reliable trout leaders ever made. Each pack contains 2 premium leaders.

- Incredible strength to diameter ratio
- Soft material for high knot strength
- High-performance taper

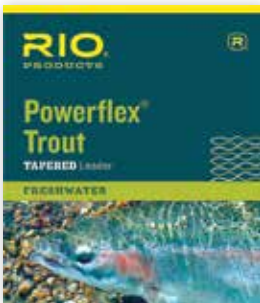

**IDEAL FOR:**

- Dry Flies
- Soft Hackles
- Nymph / Indicator Rigs
- Streamers

**Note**  
NO METRIC LABELS

**Powerflex® Trout**  
Tapered Leader

**POWERFLEX TROUT LEADERS** help you cast better and fish more effectively. The powerful butt section provides unsurpassed wind penetration and easily turns over heavy indicator rigs, while the soft, flexible tippet delivers tiny dries with delicate precision. Advanced copolymer strength allows confident hook sets and greater landing percentages.

- Aggressive high-performance taper
- Long, powerful butt section with soft, flexible tippet
- Maximum strength and abrasion resistance

**IDEAL FOR:**

- Nymph/Indicator Rigs
- Streamers
- Dry Flies

**Note**  
NO METRIC LABELS

## Powerflex® Trout – 3-Pack

Tapered Leader

**POWERFLEX LEADERS** help you cast better and fish more effectively. The powerful butt section provides unsurpassed wind penetration and easily turns over heavy indicator rigs, while the soft, flexible tippet delivers tiny dries with delicate precision. Advanced copolymer strength allows confident hook sets and greater landing percentages.

A handy pack of three – saves costs, waste and space in tightly packed vest pockets and bags.

- Aggressive high-performance taper
- Long, powerful butt section with soft, flexible tippet
- Maximum strength and abrasion resistance

### IDEAL FOR:

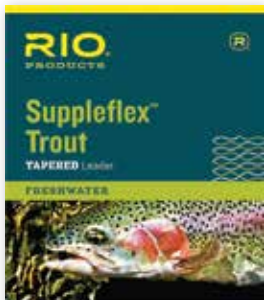

- Nymph/Indicator Rigs
- Streamers
- Dry Flies

**Note**

## Suppleflex™ Trout

Tapered Leader

**SUPPLEFLEX TROUT LEADERS** are made of a very soft, supple copolymer material that has excellent knot strength. The supple nature of the material gives featherweight presentations and does not impede the natural movement of a fly in the current. These leaders are a perfect choice for the dry fly and soft hackle fly fisher.

- Soft, supple material for perfect presentation
- Hand tied perfection loop in the butt for quick rigging
- Excellent knot and tensile strength

For further details, watch the short video about this product at <http://vimeo.com/47885954>

### IDEAL FOR:

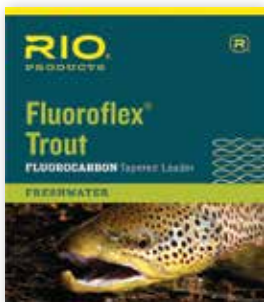

- Dry Flies
- Soft Hackles
- Emergers
- Small Nymphs

## Fluoroflex® Trout

Fluorocarbon Tapered Leader

**RIO'S FLUOROFLEX TROUT LEADERS** are made of 100% fluorocarbon, and are the perfect solution for when a nearly invisible presentation is required in clear water and for spooky fish. Each leader has high abrasion resistance and excellent tensile and knot strength, and have a long butt section that will turn over flies effortlessly.

- 100% fluorocarbon for the utmost in stealth
- Long butt section for great turnover and presentation
- Hand tied perfection loop in the butt for quick rigging

### IDEAL FOR:

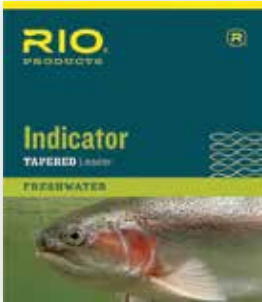

- Spring Creeks
- Clear Lakes
- Spooky Trout

**Note**  
NO METRIC LABELS

## Indicator Tapered Leader

RIO'S INDICATOR LEADERS have a unique design that is ideal for the indicator fly fisher. A powerful butt section and very short taper, easily turns over all manner of indicators, and a long, level tip section allows flies to sink evenly and quickly. The orange butt section is visible enough to be used as an indicator in its own right.

- Powerful butt and short taper for casting indicators
- Long, level tippet allows nymphs to sink evenly
- Orange butt section can be used as an indicator

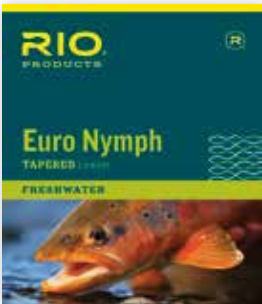

### IDEAL FOR:

- Lake Fishing
- Rivers
- Steelhead

SKU	Size	Length	Test	Diameter

## Euro Nymph Tapered Leader

RIO'S EURO NYMPH LEADERS are designed with a unique taper to meet the needs of the European nymphing methods for competitors and first timers. These 9' leaders are built out of a high-vis milky white tapered leader which is hand tied to 22" of our Indicator Tippet material. This gives maximum visibility in all lighting conditions to make subtle strike detection easier. The leader ends with a tippet ring and requires you to attach your own tippet to properly match the water type.

- Opaque white leader for visibility
- High-viz two-tone indicator tippet for maximum strike detection
- Trout sized tippet ring for fast rigging

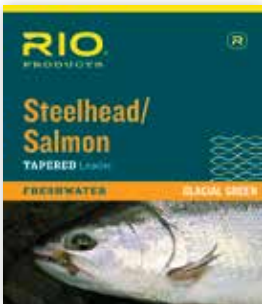

### IDEAL FOR:

- Nymph Rigs
- Competition Angling

## Steelhead / Salmon Tapered Leader

RIO'S STEELHEAD/SALMON LEADERS are designed and built to match the needs of the steelhead and salmon fly fisher. The leaders are made of a medium stiff nylon and have a powerful taper design that easily turns over larger flies, and cope with tough winds. The copolymer material is incredibly tough and highly abrasion resistant. RIO's steelhead/salmon leaders are a glacial green color for perfect camouflage. Available in 3 pack.

- Medium-stiff material for turning over larger flies
- Long butt section and taper for great turnover
- Maximum strength and abrasion resistance
- Glacier green color

### IDEAL FOR:

- Steelhead
- Salmon
- Streamers
- Spey

## Pike / Musky Tapered Leader

**IMPROVED!**

A STIFF NYLON, TAPERED LEADER attached to a tough, bite resistant wire shock tippet that is ideal for Pike, Musky, and similar toothy species. There are two wire choices: 1) A supple nylon coated braided wire (Bronze) that you can knot and 2) A nylon coated single strand steel wire (Silver) with snap link.

- Ultra tough nylon with wire shock tippet
- Choice of steel or braided wire
- Hand tied perfection loop in the butt for fast rigging

### IDEAL FOR:

- Pike
- Musky
- Tigerfish

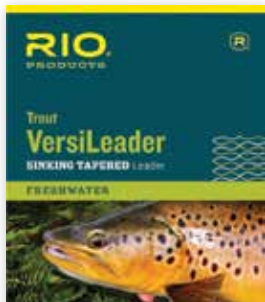

**Note**  
NO METRIC LABELS

## Trout VersiLeader

Sinking Tapered Leader

RIO'S TROUT VERSILEADERS are designed for the fly fisher who needs a quick-change option for converting a floating line to a sink tip. Each VersiLeader is tapered for the best in performance and has a 12lb nylon core coated in PVC. A neat, bullet-proof welded loop at the butt end allows for fast rigging.

- Color-coded loops for easy identification
- A complete range of sink rates
- Slim, neat welded loop in the butt for quick rigging

### IDEAL FOR:

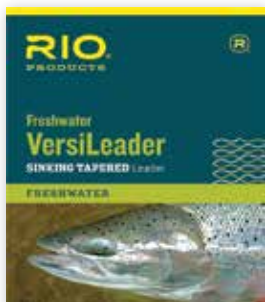

- Lakes
- Small Streams
- Large Rivers

**Note**  
NO METRIC LABELS

**PRIMED CORE, RUNNING THROUGH THE FLY LINE MACHINE, PRIOR TO HAVING A COATING APPLIED**

A person wearing a red jacket and a grey mesh vest is shown from the side, holding a spool of Rio Powerflex Plus fly fishing line. The spool is blue and yellow with the text "RIO", "Powerflex Plus", and "0x". The background is a blurred mountain landscape.

# FRESHWATER

TIPPET

## Powerflex® Plus Tippet

RIO'S POWERFLEX PLUS TIPPET, RIO's newest tippet is the strongest nylon tippet material ever made, with tensile strengths up to 20% more than regular tippet. A highly technical formulation of the nylon copolymer manufacturing process has resulted in this prodigious strength increase, without compromising knot strength or suppleness. Simply put, this is the strongest, most reliable tippet ever made. Each spool has the added bonus of 50 yards of tippet.

### FEATURES:

- Incredible strength to diameter ratio
- Soft material for high knot strength

### IDEAL FOR:

- Dry flies
- Soft hackles
- Nymph / Indicator rigs
- Streamers

RIO'S POWERFLEX PLUS TIPPET 3-PACK, Powerflex Plus 3-Packs include three, 50-yard spools of tippet packaged in a reusable, clear plastic cup. The 3-Packs are available in three configurations: 0X – 2X, 3X – 5X and 4X – 6X.

## Powerflex® Tippet

The best-selling trout tippet material in the world. Made from high tenacity copolymers and with excellent knot strength. It is ideal for trout, particularly with nymphs, dry flies and smaller streamers. Large capacity "Guide" spools are also available in 7X to 0X sizes.

RIO's Powerflex Tippet 3-Packs are a great value for guides and anglers who use a range of tippet sizes. These 3-Packs include three, 30-yard spools of our popular Powerflex Tippet packaged in a reusable, clear plastic cup.

The 3-Packs are available in three configurations: 0X – 2X, 3X – 5X and 4X – 6X.

The cups can be used to store flies, split shot, indicators or other small accessories.

### FEATURES:

- High knot strength
- Clear nylon copolymer

### IDEAL FOR:

- Dry flies
- Soft hackles
- Nymph

## Two Tone Indicator Tippet

Opaque two tone 8" sections of fluorescent pink and fluorescent chartreuse color changing tippet with highly defined hard color changes. These color breaks create maximum contrast to allow anglers to get visual cues when tight line nymphing. The best indicator material for building sighters for European Style Nymphing.

### FEATURES:

- 8" sections of contrasting color
- Pink/chartreuse color

### IDEAL FOR:

- European nymphing techniques
- Competition anglers nymphs

**A NEW FLY LINE IS BORN**

## Bass Tippet

RIO'S BASS TIPPET is a medium stiff tippet material with great abrasion resistance. It is ideal for casting bigger flies like Clouser minnows and poppers, and tough enough to withstand being scraped over rocks and submerged trees.

### FEATURES:

- Medium stiff nylon
- Great abrasion resistance

### IDEAL FOR:

- Bass bugs
- Poppers
- Larger streamers

## Powerflex® Wire Bite Tippet

Tough, flexible, nylon-coated wire – ideal for sharp-toothed critters.

### FEATURES:

- Super supple braided wire
- Easy to knot

### IDEAL FOR:

- Pike, musky, all toothy critters

24 – 38° C
- DualTone
- Front Loop
- Back Loop

## Bonefish

Example: WF8F  
Overall Length: 100'

### THE PERFECT LINE FOR ANGLERS targeting bonefish and other flats species.

- Revolutionary design allows for incredible loop stability and distance
- Unique, easy casting taper that loads a fly rod at close range
- High floating running line that will not sink and impede the cast
- Medium stiff core and hard coating that will not wilt in warm conditions

RIO'S BONEFISH line has a long head and rear taper to smooth out the loop, and to make long efficient casts, while the mid length front taper produces great turnover and easy presentation of typical bonefish flies. This is a great line for the more experienced flats angler, and ideal for fast 2nd shot casts to cruising fish.

## Bonefish QuickShooter

Example: WF8F  
Overall Length: 100'

### THE PERFECT LINE FOR ANGLERS targeting bonefish and other flats species.

- Short, easy casting head that loads a fly rod at close range
- Mid length front taper that turns over typical bonefish flies with great presentation
- Medium stiff core and hard coating that will not wilt in warm conditions
- High floating running line that will not sink and impede the cast

RIO'S BONEFISH QUICKSHOOTER has a short head, and loads a rod quickly. It is an ideal line for low light conditions and for anglers wading flats when fish are hard to spot and close range casts are required. It is also a fantastic line choice for the novice bonefish angler. AgentX Technology ensures the running line stays afloat, while a medium stiff core and tropical coating stops the line from wilting in the heat. Welded loops on both ends of the lines makes for easy rigging.

## Summer Redfish

Example: WF8F  
Overall Length: 100'

### DESIGNED FOR THE REDFISH angler targeting fish in warmer climates

- Mid-length front taper for perfect presentations, yet powerful enough to cast typical summer redfish patterns
- Easy loading head makes it simple to cast at close range
- Medium stiff core and tropical coating ensures the line does not wilt in the heat

RIO'S SUMMER REDFISH line is designed for anglers targeting redfish and speckled trout in warmer conditions. The line features a mid length front taper that casts typical redfish patterns, and allows for careful presentations so as not to spook wary Reds. The line is front weighted to easily load a rod and to cope with typical saltwater winds, and has a medium-stiff core and a hard, tropical coating that will not wilt in warmer conditions.

### Permit

Example: WF10F  
Overall Length: 100'

### DESIGNED SPECIFICALLY FOR THE demands of the Permit fly fisher

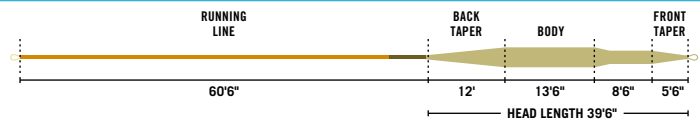

- Easy casting taper that presents typical crab patterns effortlessly
- Ideal for the wading or boat angler
- Hard, tropical coating will not wilt in the heat

RIO'S PERMIT line has been specifically designed for the Permit fly fisher. Each line features an easy casting taper that loads at close range, and yet empowers the cast for quick distance. The front taper and weight distribution reduces impact and allows for carefully presented casts so as not to spook wary Perms, while maintaining enough weight to easily cast typical crab patterns.

### Tarpon Technical

Example: WF12F  
Overall Length: 100'

### THE PERFECT LINE FOR ANGLERS targeting tarpon and other large tropical species

- Effortless casting, accurate line design that turns over typical tarpon flies with ease
- Built on a strong, medium stiff core which will not wilt in the heat

RIO'S TARPON lines features short, powerful front tapers to easily cast large flies, and are heavy enough to load modern saltwater fly rods. The series incorporates two different designs to cover all angling situations:

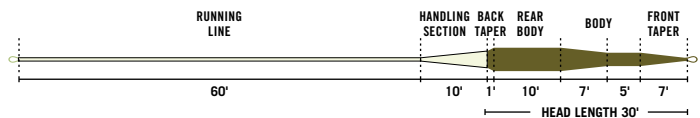

The Tarpon line has a mid-length head of around 40ft and is an ideal all-round Tarpon line

The Tarpon Technical line has a long head of around 60ft that is ideal for the more experienced tarpon angler and allows for long, controlled casts. The extra head length is ideal for fast pick-ups and 2nd shot casts.

Overall Length: 100'

### A VERY EASY CASTING, TROPICAL fly line designed for the tarpon angler

- Short, powerful head that is very easy to cast – ideal for novice tarpon anglers
- Heavier than standard tarpon lines to easily load modern saltwater rods

RIO'S TARPON QUICKSHOOTER lines have been specifically designed for tarpon and other tropical species. Every line features a powerful front taper that casts large flies, or punches into tough winds with ease. The short head is heavier than standard tarpon lines, making it easy to load and cast. Welded loops on both ends of the line allow anglers to rig easily.

Available in two formats:

- Full floating – F
- Floating with 10ft clear intermediate tip – F/I

Overall Length: 100'

### AN ALL-PURPOSE FLY LINE designed for tropical conditions

- Slightly heavier, easy casting line for a multitude of species
- Short, powerful front taper to cast large flies
- Welded loops on both ends to allow fast and easy rigging

RIO'S GENERAL PURPOSE TROPICAL SALTWATER lines are designed for anglers that fish in warm climates for a multitude of species. The lines features short, powerful front tapers and are slightly heavier than the industry standard to cast large flies and load powerful saltwater rods with ease. Each line is built on a medium stiff core, has a hard, tropical coating that will not wilt in the heat, and features welded loops on both ends for easy rigging.

Available in three formats:

- Full floating – F
- Floating with 10ft clear intermediate tip – F/I
- Full intermediate, with 10ft clear tip – I/I

## Tropical Series OutBound Short

### TECHNOLOGY:

- Extreme Slickness

### FEATURES:

- 75 – 100° F  
24 – 38° C
- DualTone
- Front Loop
- Back Loop

### Outbound Short

Example: WF8F  
Overall Length: 100'

### ULTRA POWERFUL, EASY CASTING line built for exceptionally long casts

- Heavier than standard fly lines for easy casting
- Short, powerful front taper to cast the largest of flies
- Unique, front-loaded weight distribution makes ultra-long casts

RIO'S TROPICAL OUTBOUND SHORT lines are designed for fishing in hot climates. A short, aggressive front taper easily casts large and weighted flies very long distances, while the powerful head design loads rods deeply and efficiently for effortless casts. A range of densities make this a very versatile line series. Each line features RIO's XS technology for super slick performance, and is built with a hard, tropical coating that ensures the line does not wilt in the heat.

There are four densities available:

- Full floating – F
- Floating with 30ft intermediate head (first 15ft is clear) – F/I
- Floating with 10ft clear intermediate tip – F/I
- Fast sinking head with intermediate running line – I/S6

## Tropical Series GT

### TECHNOLOGY:

AgentX

### FEATURES:

- 75 – 100° F  
24 – 38° C
- DualTone
- Front Loop
- Back Loop

### GT

Example: 550gr  
Overall Length: 100'

### DESIGNED SPECIFICALLY FOR THE demands of the GT fly fisher

- Short, heavy head that easily load powerful saltwater fly rods
- Ultra strong cores in excess of 50 lbs
- Aggressive front tapers that easily cast the largest of flies

RIO'S GT line has been specifically designed for the demanding conditions faced by the hardcore GT angler. Each line features a powerful front taper to cast the biggest of flies, and a short, heavy head to easily load powerful saltwater rods. The line is built on an extremely tough, ultra strong core in excess of 50 lbs that will easily battle large fish, and resist being cut on coral and rock structures. A hard, tropical coating prevents the line from wilting in the heat.

The 550 gr version of this line is built on a core in excess of 70lbs.

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color

## Tropical Series Leviathan

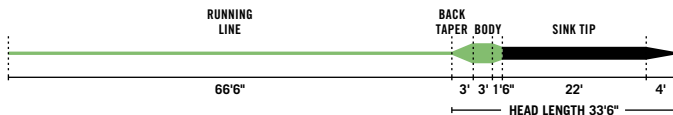

### FEATURES:

- 75 – 100° F  
24 – 38° C
- Front Loop
- Back Loop

### Leviathan 26ft Sink Tip

Example: 500gr, 26 ft Sink Tip  
Overall Length: 100'

### Intermediate Leviathan

Example: 500gr Intermediate  
Overall Length: 100'

### Billfish Shooting Head

Example: 550gr  
Overall Length: 30'

### DESIGNED FOR THE SPECIFIC DEMANDS of anglers targeting the largest tropical species

- Short, heavy head that easily load powerful saltwater fly rods
- Ultra strong cores in excess of 50 lbs
- Aggressive front tapers that easily cast the largest of flies

RIO'S LEVIATHAN lines have been specifically designed for the largest of tropical species. Each line features a powerful front taper to cast the biggest of flies, and a short, heavy head to load blue water rods. The 250gr Leviathan line is built on a 35lb core, while the 300gr to 400gr lines are built on ocean-tough, strong cores in excess of 50lbs. All Leviathan lines of 500gr and more have ultra-strong cores of 70lbs and more, that will easily battle large fish and resist being cut on coral and rock structures. A hard, tropical coating prevents the line from wilting in the heat.

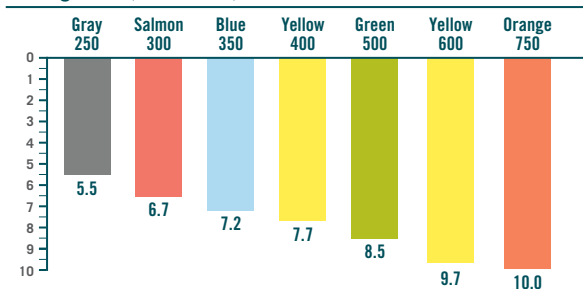

The 250gr, 300gr, 350gr and 400gr, 26ft Sink tip lines, and the 30 ft, 550gr Billfish Shooting Head have welded loops on both ends for easy rigging. In addition, the Billfish Shooting Head has a bright orange, 4ft long rear section so anglers can easily see the rear end of the head.

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
<b>Leviathan 26ft Sink Tip</b>

550gr	12 - 14 weight
600gr	14 - 16 weight
750gr	15+ weight

### Sinking Rates (Inches Per Second)

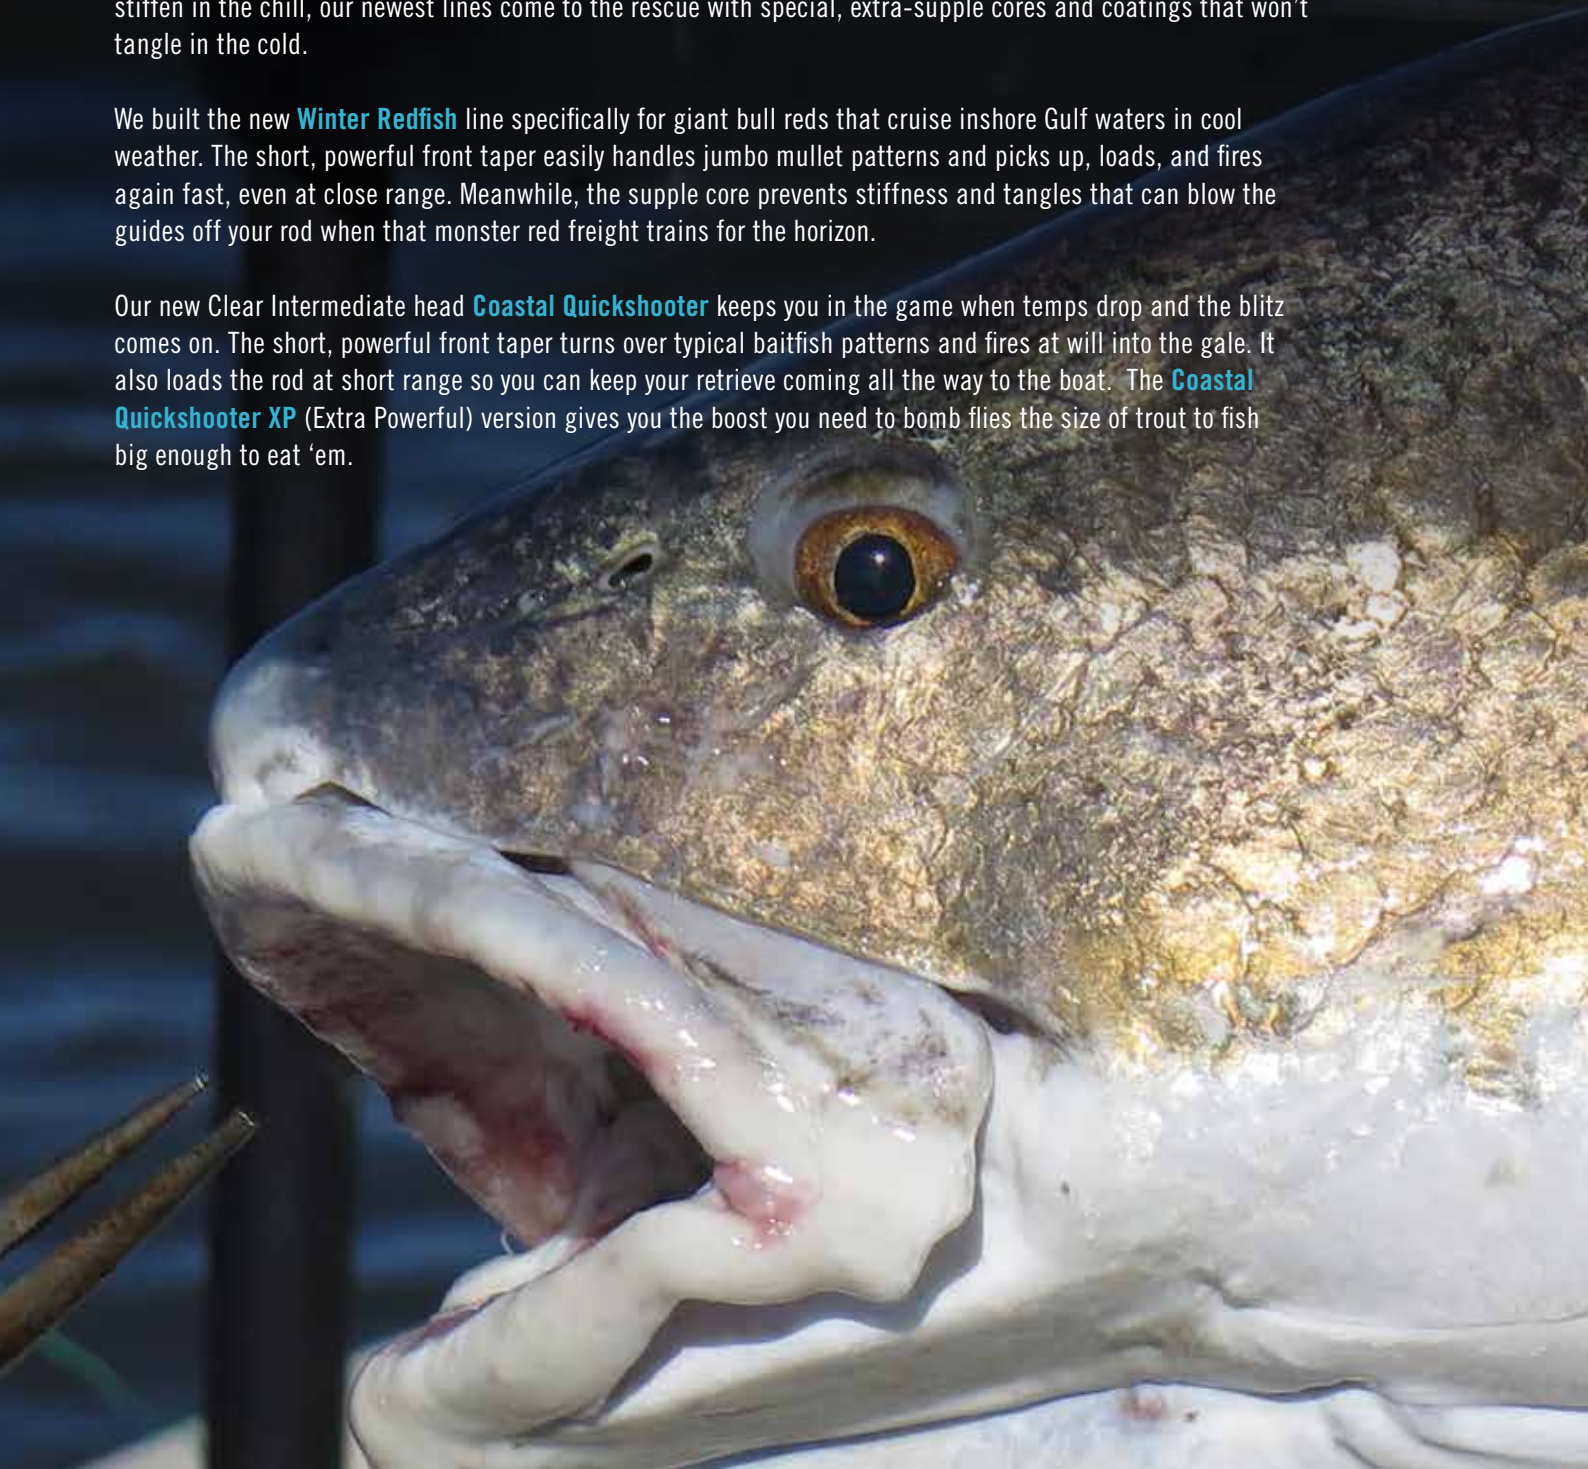

# FISH BEHAVE DIFFERENTLY IN COLD WATER. SO DO FLY LINES

## **Introducing Our Newest Coldwater Lines: Winter Redfish and Coastal QuickShooter**

If saltwater fly fishing was all tropical water and palm trees, fact is, most of us would have to hang up our rods for the better part of the year. And that is simply not acceptable. When the Nor'easters crank up and fingers stiffen in the chill, our newest lines come to the rescue with special, extra-supple cores and coatings that won't tangle in the cold.

We built the new **Winter Redfish** line specifically for giant bull reds that cruise inshore Gulf waters in cool weather. The short, powerful front taper easily handles jumbo mullet patterns and picks up, loads, and fires again fast, even at close range. Meanwhile, the supple core prevents stiffness and tangles that can blow the guides off your rod when that monster red freight trains for the horizon.

Our new Clear Intermediate head **Coastal Quickshooter** keeps you in the game when temps drop and the blitz comes on. The short, powerful front taper turns over typical baitfish patterns and fires at will into the gale. It also loads the rod at short range so you can keep your retrieve coming all the way to the boat. The **Coastal Quickshooter XP** (Extra Powerful) version gives you the boost you need to bomb flies the size of trout to fish big enough to eat 'em.

NEW!

## Coldwater Series Winter Redfish

### TECHNOLOGY:

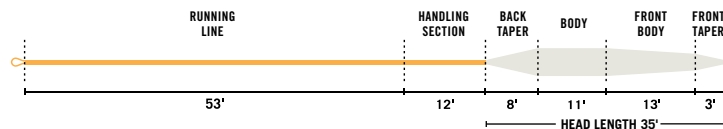

Extreme Slickness

### FEATURES:

- 50 – 80° F  
10 – 27° C
- DualTone
- Front Loop
- Back Loop

### Winter Redfish

Example: WF8F  
Overall Length: 100'

**DESIGNED FOR THE WINTER REDFISH ANGLER**, and for casting large flies.

- Short, powerful front taper to turnover large flies
- Supple core and coating that will not tangle in cooler conditions
- Short, easy loading head that empowers the cast at close range

RIO'S WINTER REDFISH line is designed specifically for anglers targeting big gulf Reds in cooler conditions. The line features a short, powerful front taper that has no problem turning over large mullet and baitfish patterns, while the short, easy casting head ensures the line loads up at close range. The line has a slick coating and medium-stiff core that will not tangle in cooler conditions, and features RIO's XS and AgentX technologies, as well as welded loops on both ends.

- Works with both mono and VersiLeaders

**RIO COASTAL SEATROUT** We decided to make a WF line to follow up on our very successful shooting head series Coastal Seatrout SHD that came out last season.

We have designed RIO's COASTAL SEATROUT WF for easy casting with maximum distance and perfect presentation in typical coastal conditions. These lines are ideal for the angler targeting the Seatrout and other species along a cold water coastline at any time a year.

Coastal Seatrout are available in a range of densities to cover all water conditions and locations.

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
<b>NEW! Coastal Seatrout</b>						
RP52300	WF5F	8,80 m	14 g	100ft / 30.5m	Float	Teal / White
RP52301	WF6F	9,30 m	16 g	100ft / 30.5m		
RP52302	WF7F	10,0 m	18 g	100ft / 30.5m		
RP52303	WF8F	10,50 m	20 g	100ft / 30.5m	Float /Hover	White / Glacier
RP52304	WF5/S1	8,80 m	14 g	100ft / 30.5m		
RP52305	WF6/S1	9,30 m	16 g	100ft / 30.5m

## Coldwater Series Coastal QuickShooter

NEW!

### TECHNOLOGY: FEATURES:

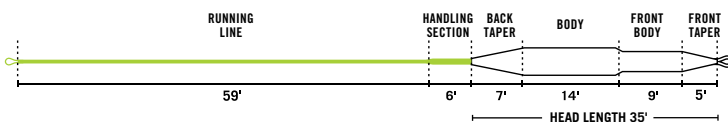

Extreme Slickness

50 – 80° F  
10 – 27° C

- DualTone
- Front Loop
- Back Loop

### Coastal QuickShooter

Example: WF8I  
Overall Length: 100'

### Coastal QuickShooter XP

Example: WF8I  
Overall Length: 100'

### DESIGNED FOR THE COASTAL SALTWATER ANGLER, fishing in cooler conditions.

- Short, powerful front taper to turnover large flies
- Supple core and coating that will not tangle in cooler conditions
- Clear, easy loading head that empowers the cast at close range

RIO'S COASTAL QUICKSHOOTER line features a clear intermediate head, and is designed specifically for anglers fly fishing off the coast in cooler conditions. The line features a short front taper that has no problem turning over baitfish and shrimp patterns in typical coastal winds, and has a short, easy casting head to help the rod load at close range.

SKU	Size	Head Length	Head Weight	Overall Length	Sink Rate	Color
NEW! Coastal QuickShooter						
RP21002	WF5I	34ft / 10.3m	11,4g	90ft / 27.6m	Intermediate (1.5ips)	Clear / Chartreuse
RP21003	WF6I	35ft / 10.6m	13,6g	90ft / 27.6m		
RP21004	WF7I	35ft / 10.6m	14,9g	90ft / 27.6m		
RP21005	WF8I	36ft / 10.9m	16,2g	100ft / 30.5m		
NEW! Coastal QuickShooter XP						
RP21006	WF8I	32ft / 9.7m	21,2g	100ft / 30.5m	Intermediate (1.5ips)	Clear / Purple
RP21007	WF9I	33ft / 10m	24,4g	100ft / 30.5m		
RP21008	WF10I	33ft / 10m	27,6g	100ft / 30.5m		

THE COASTAL QUICKSHOOTER XP (Extra Powerful) is a much heavier line, with more weight at the front and is specifically designed for casting the largest of flies.

## Coldwater Series General Purpose Saltwater

### TECHNOLOGY: FEATURES:

AgentX

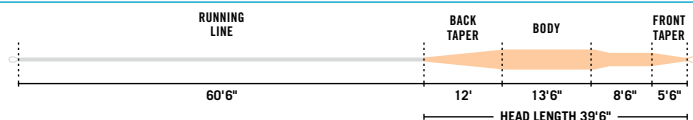

Extreme Slickness

50 – 80° F  
10 – 27° C

- DualTone
- Front Loop
- Back Loop

### General Purpose Saltwater

Overall Length: 100'

### AN ALL-PURPOSE SALTWATER fly line designed for early season and cool climates

- Slightly heavier, easy casting line for a multitude of species
- Coldwater core that stays limp even in the coldest of conditions
- Welded loops on both ends to allow fast and easy rigging

RIO'S GENERAL PURPOSE SALTWATER fly line is designed for anglers that fish non tropical destinations, and for early season bonefish. The line is built with a supple braided multifilament core that ensures the line stays limp in the coolest of conditions, and has a hard, AgentX and XS technology saltwater coating for the slickest of finishes. It is suitable for a multitude of saltwater species. Welded loops on both ends of the line allow anglers to rig easily.

## Coldwater Series InTouch Striper

### TECHNOLOGY:

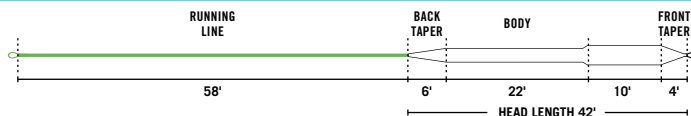

- ConnectCore
- Extreme Slickness

### FEATURES:

- 50 – 80° F  
10 – 27° C
- Density Compensation  
(On 30ft Sink Tip Only)
- Front Loop
- Back Loop

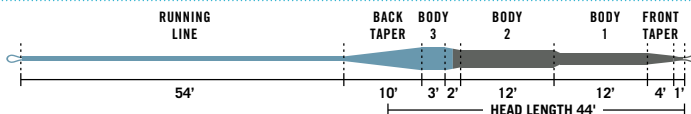

### InTouch Striper Intermediate

Example: WF9I  
Overall Length: 100'

### InTouch Striper 30ft Sink Tip

Example: 350gr  
Overall Length: 100'

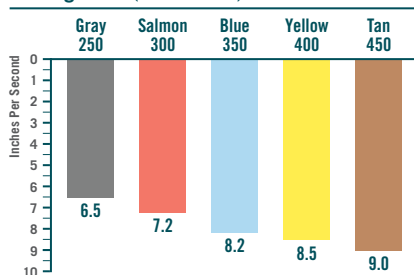

### A COMPLETE SERIES OF FLY LINES developed for the striped bass angler

- Ultra-low stretch ConnectCore for maximum performance
- Front biased weight to load rods at close range
- Density compensation on sinking lines
- Luminous running line on intermediate line for night fishing

RIO'S INTOUCH STRIPER lines are built with RIO's ultra-low stretch ConnectCore Technology for the modern striper angler, with easy casting, front-loaded heads. There are three line types within this series: 1) A full floating line, 2) an intermediate sinking line with luminous running line, and 3) A series of 30 ft long sinking head lines with intermediate running lines. Each sinking line is density compensated and allows anglers to stay in touch with the fly. Welded loops on both ends of all lines make for fast rigging.

## Coldwater Series InTouch OutBound Short

### TECHNOLOGY:

ConnectCore

Extreme Slickness

### FEATURES:

50 – 80° F

10 – 27° C

→ Density Compensation  
(Sinking Lines Only)

→ DualTone

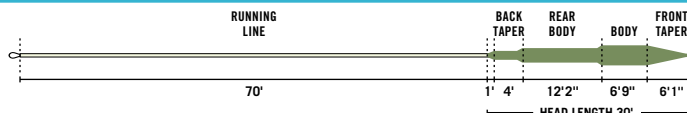

→ Front Loop

→ Back Loop

### InTouch OutBound Short

Example: WF8F

Overall Length: 100'

**EXCEPTIONALLY POWERFUL, EASY CASTING**, line built for maximum distance, with ultra-low stretch performance

→ Ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance

→ Heavier than standard fly lines for easy casting

→ Short, powerful taper to cast the largest of flies

RIO'S INTOUCH OUTBOUND SHORT series of lines are designed to cast large and heavy flies very long distances. A short, aggressive front taper easily carries large, weighted streamers, while the powerful head design loads rods deeply and efficiently for effortless casts. A full range of densities make this a very versatile line series. Built with ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance.

Four different densities make up this line series:

→ A full floating line – F

→ A floating line with a 15ft intermediate tip – F/I

→ A full intermediate line with a 30ft gray colored head – I

→ An intermediate line with a 30ft fast sinking, type 6 (6in per second) head – I/S6

Overall Length: 100'

### InTouch OutBound Custom

Example: T-11

Overall Length: 100'

**POWERFUL, EASY CASTING LINE** built for exceptionally long casts, with ultra-low stretch performance.

→ Ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance

→ Heavier than standard fly lines for easy casting

→ Designed to cast the largest of flies

→ Unique, front-loaded weight distribution makes ultra-long casts

RIO'S INTOUCH OUTBOUND lines are designed to cast very long distances. Each line is heavier than standard fly lines and deeply load modern rods for maximum distance. Each line features RIO's XS technology for super slick performance and is built with ultra-low stretch ConnectCore Technology for the maximum in sensitivity, control and performance. A supple coating gives tangle-free performance.

Two different densities make up this line series:

→ A full floating line – F

→ A floating line with a 38ft intermediate head – F/I

InTouch OutBound Custom lines have a long, fast-sinking, level sink tip that is designed to be cut and tuned to each angler's individual preference.

10 – 27° C
- Density Compensation  
(Sink 3 & Sink 6 Only)
- EasyID
- Front Loop
- Back Loop

### OutBound Short Shooting Head

Example: ST8F  
Overall Length: 30'

### POWERFUL, EASY CASTING SHOOTING HEADS that make long distance casts simple

- Unique taper design that stays in the air, resulting in long distance casts
- Short, powerful front taper that cast large flies easily
- Front-loaded weight distribution that loads rods quickly and effortlessly

RIO's shooting heads are based on the popular OutBound Short lines, and are designed to cast very long distances. The front loaded weight distribution quickly loads a rod, while the unique step down taper at the back allows for very long flight times and easy distance. The heads are built above the AFTM standard to correctly load modern rods - anglers do not need to step up a line size when choosing a line for their rod, as this is done in the design. Each head has Easy ID for quick identification.

RIO recommends attaching the following head sizes to these shooting lines sizes:

- ST7 to ST8 – 0.024"/0.026" shooting line, or 25lb SlickShooter/GripShooter
- ST8 to ST10 – 0.030"/0.032" shooting line or 35lb SlickShooter/GripShooter

## Avid Series Saltwater

### TECHNOLOGY:

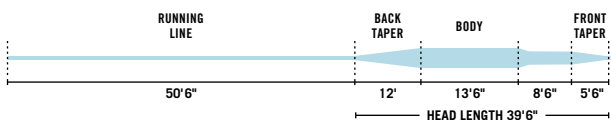

AgentX  
Extreme Slickness

### FEATURES:

→ Front Loop

### Avid Saltwater

Example: WF8F  
Overall Length: 90'

### DEVELOPED WITH TAPERS and technology that enhance the fly fishing experience

- Slightly heavier, easy casting lines for a multitude of species
- Short, powerful front taper for good presentation and turnover
- Welded loop on the front end to allow for fast and easy rigging

RIO's Avid series of fly lines were developed for the keen fly fisher with tapers and technology that enhance the fly fishing experience. The lines are designed for easy casting performance, with slightly heavier and shorter head lengths. Each line is built on a supple memory-free core, and has a hard, saltwater coating that will not get sticky in the heat. A welded loop on the front end allows anglers to rig easily.

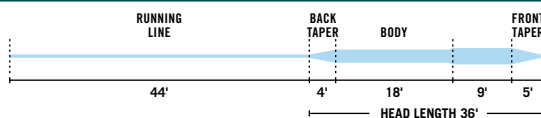

SKU	Size	Head Length		Overall Length	Sink Rate	Color

## Mainstream Series Saltwater

### Mainstream Saltwater

Example: WF10F  
Overall Length: 80'

### TARGETED TO THE OVERALL needs of the average fly fisher

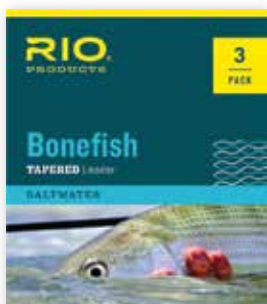

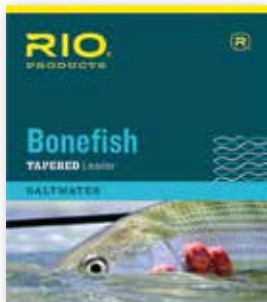

- Slightly heavier, easy casting lines for a multitude of species
- Short, powerful front taper for good presentation and turnover

RIO's Mainstream saltwater fly lines have been developed to meet the overall needs of the average and novice fly fisher, and are designed to optimize rod performance with slightly heavier and shorter head lengths. Every Mainstream line undergoes the same rigorous production processes and quality control standards as all RIO fly lines, and is made in RIO's Idaho manufacturing facility. Each saltwater line is built with a hard, saltwater coating for the best in performance.

RP20765	WF12F	38ft / 11.6m	34,5g	80ft / 24.4m		

## Bonefish Tapered Leader

RIO'S BONEFISH LEADERS are designed and built to match the needs of the bonefish fly fisher. The leaders are made of a medium stiff nylon and have a powerful taper design that easily turn over typical bonefish flies, and cope with tough winds. The copolymer material is easy to knot and retains high knot strength.

A handy pack of three of the above leaders – saves costs, waste and space in tightly packed vest pockets and bags.

- Medium-stiff material for turning over larger flies
- Easy knotting, high strength leader
- Hand tied perfection loop in the butt for quick rigging

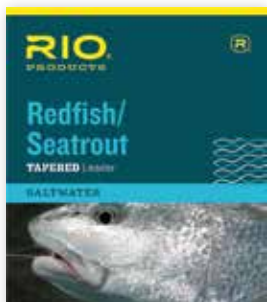

### IDEAL FOR:

- Bonefish
- Redfish
- Other Flats Species

**Note**  
NO METRIC LABELS

## Redfish/Seatrout Tapered Leader

RIO'S REDFISH/SEATROUT LEADERS have been designed for the fly fisher that pursues Redfish, Seatrout and other similar saltwater species. They have a taper design that easily turns over typical saltwater patterns, and are made of a medium stiff nylon that will cope with tough winds.

- Medium-stiff material for casting saltwater flies
- Tough, abrasion resistant nylon for durability
- Hand tied perfection loop in the butt for quick rigging

### IDEAL FOR:

- Small Clousers
- Minnow and Crab Patterns
- Surface Flies

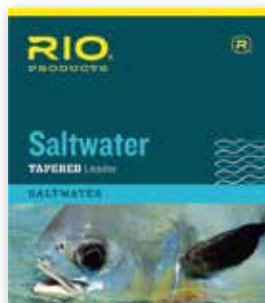

**Note**

## Saltwater Tapered Leader

RIO'S SALTWATER LEADERS are an excellent general purpose saltwater leader for a multitude of species. The leaders are made of a medium stiff nylon and have a taper design that easily turns over typical saltwater patterns and copes with tough winds. The leader is made of a material that is easy to knot and has great knot strength.

- Medium-stiff material with great knot strength
- Easy casting taper design that casts typical saltwater flies
- Maximum strength and abrasion resistance

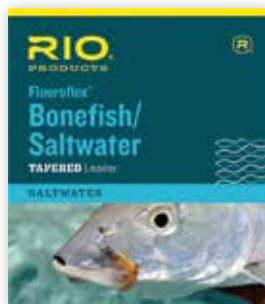

### IDEAL FOR:

- Permit
- Bonefish
- Stripers
- Roosters

## Fluoroflex® Bonefish/Saltwater Tapered Leader

RIO'S BONEFISH/SALTWATER FLUOROFLEX LEADERS are made of 100% fluorocarbon, and are the perfect solution when fishing shallow, clear flats and for spooky bones, permit and reds. Each leader has high abrasion resistance and excellent tensile and knot strength and a long butt section that will turn over flies effortlessly.

- 100% fluorocarbon for the utmost in stealth
- Long butt section for great turnover and presentation
- Hand tied perfection loop in the butt for quick rigging

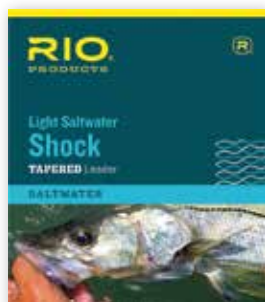

### IDEAL FOR:

- Bonefish
- Permit
- Redfish

SKU	Size	Length	Test	Diameter

## Light Saltwater Shock Tapered Leader

RIO'S LIGHT SALTWATER SHOCK LEADERS feature a tough fluorocarbon shock tippet that protects the leader from teeth, gill plates and spines, and are ideal for snook, small tarpon and similar "problem" species. The main body of the leader is made with a stiff nylon that tapers down to 16lb before being tied to the shock tippet.

- Fluorocarbon shock tippet for protection
- Stiff butt and leader for casting big flies
- Maximum strength and abrasion resistance

### IDEAL FOR:

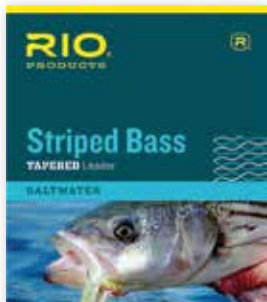

- Baby Tarpon
- Snook
- Stripers

## Striped Bass Tapered Leader

**RIO'S STRIPED BASS LEADERS** are designed and built to match the needs of the striped fly fisher. The leaders are made of a stiff nylon and have a powerful butt and taper design that easily turns over large striper patterns and copes with tough winds. The nylon is easy to knot and retains high knot strength.

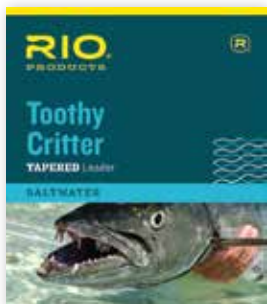

- **Powerful butt and taper design to cast large flies**
- **Easy knotting, high strength leader**
- **Maximum strength and abrasion resistance**

### IDEAL FOR:

- **Bait Patterns**
- **Clousers**
- **Surface Flies**

## Toothy Critter Tapered Leader

**IMPROVED!**

A **STIFF NYLON, TAPERED LEADER** attached to a tough, bite resistant wire shock tippet that is ideal for Bluefish, Barracuda, and similar toothy critters. There are two wire choices: 1) A supple nylon coated braided wire (Bronze) that you can knot and 2) A nylon coated single strand steel wire (Silver) with snap link.

- **Powerful butt and taper design to cast large flies**
- **Tough wire bite tippet for protection**
- **Maximum strength and abrasion resistance**

### IDEAL FOR:

- **Bluefish**
- **Barracuda**

## Tarpon 3-Pack / Tarpon Pro 2-Pack Tapered Leader

**GUIDE'S FAVORITE!** A hand crafted leader of ultra hard saltwater nylon, tied to a tough fluorocarbon shock tippet for the ultimate in protection.

- **Ultra-tough nylon leader with shock tippet**
- **Hand-twisted butt for shock absorption**
- **Available with numerous shock tippet sizes**

### IDEAL FOR:

- **Tarpon**
- **Billfish**
- **Giant Trevally**

**TARPON PRO LEADER** RIO's hand tied tarpon leader takes all the guesswork out of your tarpon fishing. Designed from years of testing and countless feedback from the best Florida Keys guides, our leader is ready to fish out of the package. Simply loop to the end of your line then tie on a fly. The 10ft design is tied with a heavy butt section for wind penetration and turnover, a class tippet for rod and fish protection, and a fluorocarbon bite tippet for abrasion resistance. Available in 20, 30, and 40lb class tippets, with 60, and 80lb fluorocarbon bite tippet. RIO's leaders are tied with advanced 100% strength knots and they're the perfect choice for all tarpon destinations.

NEW!

## Saltwater Mono

RIO'S NEW SALTWATER MONO is the go-to choice for anglers looking to tie their own leaders for tarpon, bonefish, permit, and other saltwater species. The material has a great strength-to-diameter ratio, ample abrasion-resistance, lacks memory and provides incredible knot-ability. Available in size 8lb to 60lb, there is an appropriate diameter for any leader's butt section, plus a great range of sizes to taper down with.

- Medium stiff nylon
- Great knot strength

### IDEAL FOR:

- The majority of saltwater species and flies

# LAUNCH THAT CRAZY-LONG CAST AND ACTUALLY FISH IT, TOO

## **Introducing InTouch MidHead Spey and Powerflex Max shooting line**

Many anglers—and lines—can cast clear across the river, but few can fish there. And since we're a company obsessed with the connection between anglers and fish, simply building lines that cast far isn't good enough. Our newest Spey lines are built for distance, sure, but more importantly, they're built to help you fish better and farther away than ever before.

The new **InTouch Mid Head Spey** line offers the perfect blend of distance and line control for mid-sized rivers. The easy-casting mid-length head features a long, stepped front taper that unrolls with max efficiency, while providing the length necessary for long, complex mends across varying currents. The result? Perfect swings, all the way across the river.

Our new **Powerflex Max** shooting line flies through guides like monofilament but handles—and fishes—like a traditional, coated running line. The hard, tough coating and RIO XS ultra-slick technology provide mind-blowing distance, while the Powerflex Core prevents wilting and tangles. More importantly, Powerflex Max has just enough diameter to set up your swing and fish effectively through the seam.

# HOW TO SELECT THE RIGHT RIO SPEY LINE

## IN THREE EASY STEPS

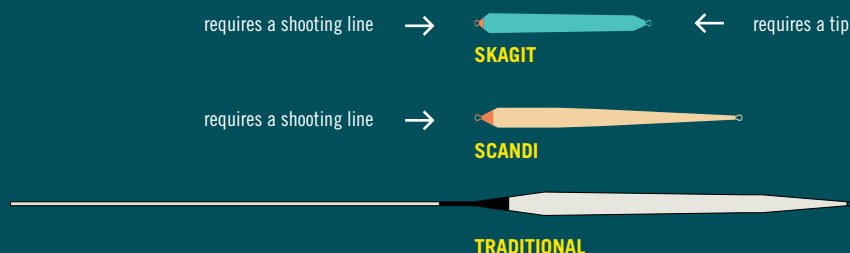

### 1 Choose the line type:

There are three families of Spey lines: “Skagit”, “Scandinavian” and “Traditional”

**Skagit:** Best for big flies and sinking tips – easy to cast.

**Scandinavian:** Ideal for smaller flies and better presentation – easy to cast

**Traditional:** Suitable for better casters, not for beginners.

- Choose a Skagit line to cast big flies and/or sink tips
- Choose a Scandi line for lighter presentation and smaller flies
- Choose a Traditional Spey line for bigger rivers and big rods. Remember, the longer the head, the more difficult it is to cast

### 2 Choose the right line weight.

“Spey” gets complicated because some lines are measured in “grains” not “line size”. Knowing the grain range per line size helps you match a suitable grain weight line to a rod. Here’s a grain weight to line size conversion guideline (not for single-handed rods). *Novice casters should err towards the upper end of the grain range for Skagit heads and towards the lower end for Scandi heads.*

Line Size	Grains	Grams	Line Size	Grains	Grams
#5	300-375gr	20-24g	#8	500-575gr	32-37g
#6	375-450gr	24-29g	#9	575-650gr	37-42g
#7	450-525gr	29-34g	#10	650-725gr	42-47g

### 3 Choose the right head length.

Shorter Spey and “Switch” rods require a shorter head length to cast. RIO has made it easy to choose the right line by using the word “Short” in the product name. If the rod is 12’ 6” or less, choose a “Short” line — a Skagit Max Short or a Scandi Short VersiTip (depending on point 1 above) for example. If the rod is longer than 12’ 6”, don’t go with the “Short” versions. The longer the head length, the harder it is to cast, and more room is needed behind the caster. However, the longer the head, the less line there is to strip in between each cast - increasing fishing time.

# HOW TO SELECT THE RIGHT LINE FOR SWITCH RODS

## IN THREE EASY STEPS

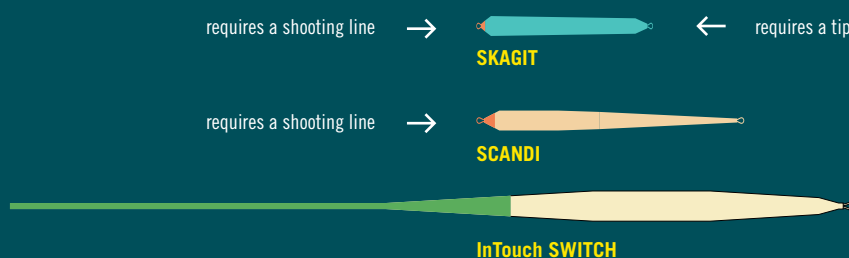

### 1 Choose the line type:

There are three families of Spey lines for Switch rods: “Skagit”, “Scandinavian” and “Switch”

**Skagit:** Shooting head - best for big flies and sinking tips – easy to cast.

**Scandinavian:** Shooting head - ideal for smaller flies and better presentation – easy to cast

**Switch:** Integrated lines with attached running line.

- Choose a Skagit line to cast big flies and/or sink tips
- Choose a Scandi line for lighter presentation and smaller flies
- Choose a Switch line if you don't want the hassle of connecting heads to shooting lines

### 2 Choose the right line weight.

“Spey” gets complicated because some lines are measured in “grains” not “line size”. Knowing the grain range per line size helps you match a suitable grain weight line to a rod. Here's a grain weight to line size conversion guideline. *Novice casters should err towards the upper end of the grain range for Skagit heads and towards the lower end for Scandi heads.*

Line Size	Grains	Grams	Line Size	Grains	Grams
#4	275-325gr	18-21g	#7	450-525gr	29-34g
#5	300-375gr	20-24g	#8	500-575gr	32-37g
#6	375-450gr	24-29g	#9	575-650gr	37-42g

→ One frequently missed conversion is that a rod requires less line weight to load it when overhead casting, so if using a Switch rod for predominantly overhead casting, go with the lowest end of the above guideline.

→ Switch Lines have the same line designation as rods, so choose a #5 for a #5, a #7 for a #7 and so on.

### 3 Choose the right head length.

“Switch” rods require a shorter head length to cast than regular two-handed “Spey” rods. RIO has made it easy to choose the right line by using the word “Short” in the product name. Choose a **Skagit Max Short** for big flies or a **Scandi Short VersiTip** (depending on point 1 above) for example.

As far as the dedicated “Switch” lines go, the **InTouch Switch** line has a long head of around 55ft, which is ideal for anglers that want the ability to mend at long range. Choose this if mending ability is one of the primary considerations.

The **InTouch Switch Chucker** is short and very easy to cast. It is the best choice for anglers wanting an integrated line that will throw indicator rigs or sink tips, and a particularly excellent choice for novice Switch rod users.

## Skagit Series Skagit Max Shooting Head

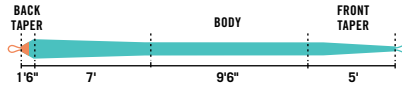

### TECHNOLOGY:

- ConnectCore
- Extreme Slickness

### FEATURES:

- EasyID
- Front Loop
- Back Loop

**Skagit Max**  
Example: 550gr  
Overall Length: 23'

### EASY CASTING, ULTRA-POWERFUL HEADS for big flies and sink tips

- Powerful front end to easily cast large flies and fast sinking tips
- Ultra-low stretch core for the best in casting and fishing sensitivity
- Complete series of heads with varying lengths and small size increments

RIO SKAGIT MAX heads cast large flies and the fastest of sinking tips with exceptional ease. The unique weight distribution deeply loads rods for long, powerful casts, while the subtle taper design generates smooth, easy loops and long, long distances.

RIO offers three different length options. As a guideline:

- 1) Use "Max Shorts" on single-handed rods, Switch rods and Spey rods less than 12' 6" in length.
- 2) Use "Skagit Max" heads for rods between 12' 6" and 13' 6".
- 3) Use "Max Longs" on rods longer than 13' 6".

All Skagit heads are built on an ultra-low stretch core for the maximum in casting and fishing sensitivity.

For best performance, RIO recommends attaching the following head sizes to these shooting lines sizes:

200 to 400 gr – .024"/.026" shooting line, or 25lb SlickShooter/GripShooter.

400 to 550 gr – .030"/.032" shooting line, or 35lb SlickShooter/GripShooter.

550 to 675 gr – .035"/.037" shooting line, or 44lb SlickShooter/GripShooter.

675 gr and heavier – .040"/.042" shooting line, or 50lb SlickShooter/GripShooter

## Skagit Series Skagit Max VersiTip

### TECHNOLOGY:

 ConnectCore

 Extreme Slickness

### FEATURES:

- EasyID
- Front Loop
- Back Loop

### Skagit Max

Example: 550gr  
Overall Length: 23'

### A COMPLETE, READY-TO-GO package for the Skagit angler

- Powerful front end to easily cast large flies and fast sinking tips
- Ultra-low stretch core for the best in casting and fishing sensitivity
- Includes a balanced set of sink tips and shooting line in a ready-to-go package

RIO'S SKAGIT MAX VERSITIP is a ready-to-go line system for the two handed angler. Each package includes a Skagit Max shooting head that is designed to cast large flies and fast sinking tips with ease. Also included is a balanced set of tips to cover changing fishing conditions and an appropriately sized shooting line. Each head is built on an ultra-low stretch core for the maximum in casting and fishing sensitivity.

RIO offers two different length options. As a guideline:

- 1) Use "Max Shorts" on single-handed rods, Switch rods and Spey rods less than 12' 6" in length.
- 2) Use "Skagit Max" heads for rods longer than 12' 6"

## Skagit Series Skagit iFlight Shooting Head

### TECHNOLOGY:

 ConnectCore

 Extreme Slickness

### FEATURES:

- EasyID
- Front Loop
- Back Loop

### Skagit iFlight

Example: 550gr  
Overall Length: 22'

### POWERFUL, EASY CASTING HEADS designed to cast sink tips and large flies

- Powerful front end to easily cast large flies and fast sinking tips
- Ultra-low stretch core for the best in casting and fishing sensitivity
- Complete series of heads with varying lengths and small size increments

RIO'S IFLIGHT heads are powerful, intermediate Skagit heads (with a short floating back section) that gives anglers deep, slow swings, and cast large flies and the fastest of sinking tips with exceptional ease. The unique weight distribution deeply loads rods for long, powerful casts, while the subtle taper design generates smooth, easy loops. All Skagit heads are built on an ultra-low stretch core for the maximum in casting and fishing sensitivity.

For best performance RIO recommends matching the following head and shooting line sizes:

Less than 400 gr – .024"/.026" shooting line, or 25lb SlickShooter/GripShooter.

400 to 550 gr – .030"/.032" shooting line or 35lb SlickShooter/GripShooter.

550 to 675 gr – .035"/.037" shooting line, or 44lb SlickShooter/GripShooter.

675 gr and heavier – .040"/.042" shooting line or 50lb SlickShooter/GripShooter

## Skagit Series Skagit Trout Max Shooting Head

### TECHNOLOGY:

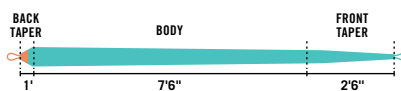

ConnectCore

### FEATURES:

- Front Loop
- Back Loop

### Skagit Trout Max

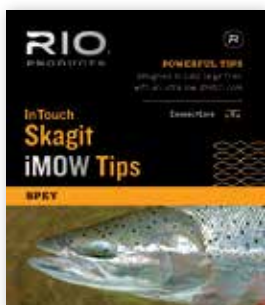

Example: 250gr  
Overall Length: 11'

RIO'S SKAGIT TROUT MAX heads are designed for two-handed fishing for trout. Their mass distribution allows for easy, sustained-anchor casts with sink tips and weighted flies. Coupled with floating tips and long, tapered leaders, the heads delicately present nymphs and soft hackles. The short length makes them fantastic tools for casting in the tightest of quarters and also well-suited for a wide range of fly presentation techniques, including stripping, jigging and the traditional downstream swing. Though primarily designed for light two-handed and Switch rods, these heads also perform exceptionally well on single-handed rods. Just step up 3 sizes for the correct loading - in other words, use the #2 Skagit Trout Max on a 5wt single handed rod, the #3 Skagit Trout Max on a 6wt single handed rod, and so on. These heads are built on RIO's ultra-low stretch ConnectCore for the maximum in bite detection, hook set and fish playing efficiency.

## Skagit InTouch iMOW Tips

### TECHNOLOGY:

ConnectCore

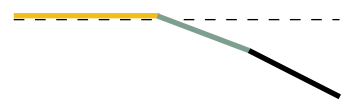

### FEATURES:

- Front Loop
- Back Loop

With floating based MOW tip

With intermediate based iMOW tip

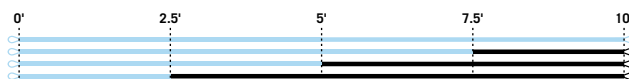

RIO'S iMOW tips have an intermediate section, instead of a floating, which creates a smooth depth transition between a floating body and fast sinking tip, and perfect contact between the angler and the fly, they are also the ideal tip for intermediate based Skagit heads, like RIO's iFlight. There are three weight series (Light, Medium and Heavy) and four tips within each series, as well as a complete kit with all 4 tips of a series packaged in a RIO leader wallet. All MOW tips are built on RIO's ConnectCore for Ultra-low stretch performance.

**Light iMOW tips** feature T-8 for a sinking section (with a sink rate of about 7" per second) and are most suitable for Skagit lines of 475 grains and less.

**Medium iMOW tips** feature T-11 for a sinking section (with a sink rate of about 8" per second) and are most suitable for Skagit lines between 475 and 575 grains.

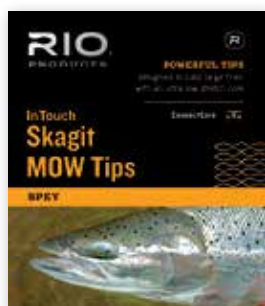

**Heavy iMOW tips** feature T-14 for a sinking section (with a sink rate of about 9" per second) and are most suitable for Skagit heads of 575 grains and heavier.

**TECHNOLOGY:**

 **ConnectCore**

**FEATURES:**

- Front Loop
- Back Loop

**POWERFUL LEVEL TIPS** designed to cast the biggest flies with ease.

These tips allow anglers using Skagit lines to cover every likely fishing situation and conditions encountered, and are the absolute ultimate in sinking tip versatility. All MOW tips are built on RIO's ConnectCore for Ultra-low stretch performance.

The **Extra Heavy MOW Tips** are the heaviest of the MOW series; built with T-17 for the sinking section and with a sink rate of nearly 10" per second, it really gets down when depth is needed. Each of the tips either have a gray floating section, or a gray loop for easy identification. These tips are ideal on the heavier Skagit lines of 675 grains and more.

The **Heavy MOW Tips** feature T-14, with a sink rate of 9" per second, for the sinking material. Each of these tips has either a light blue floating section or a blue sleeve on one end for easy identification. The Heavy MOW Tips are designed for the heaviest of flies and are ideal for Skagit lines of 575 grains and more. There are six unique tips that make up the series.

The **Medium MOW Tips** feature T-11, with a sink rate of 8" per second, for the sinking material. Each of these tips has either a light green floating section or a green sleeve on one end for easy identification. The Medium MOW Tips are designed for heavily weighted flies and are ideal for Skagit lines between 475 and 575 grains. There are six unique tips that make up the series.

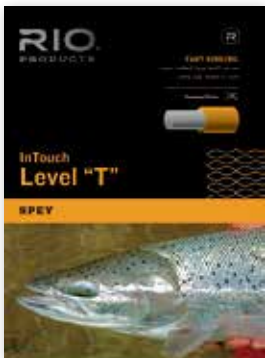

The **Light MOW Tips** feature T-8, with a sink rate of 7" per second, for the sinking material. Each of these tips has either a white floating section or a white sleeve on one end for easy identification. The Light MOW Tips are designed for lightly weighted flies and are ideal for Skagit lines of 475 grains and less. There are six unique tips that make up the series.

Overall Length: 30'  
Example: T-14  
Overall Length: 500'

### FAST SINKING, LEVEL TUNGSTEN TIPS that sink like a rock.

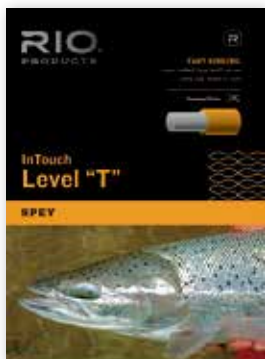

These fast sinking, level tips use tungsten powder for density, not lead and, as a result, are supple, do not kink and sink like a rock. Built on RIO's ultra-low stretch ConnectCore, they are extremely sensitive to soft grabs and ensure fast, solid hook sets.

The tips are color-coded for quick identification and are made with an easy-to-weld coating, allowing anglers and retailers alike to make fast, neat welded loops.

Each tip is designed to be cut and tuned to the angler's individual fishing and casting requirements.

## Spey Accessories Welding Tubing

RIO Welding Tubing compliments the InTouch level "T" sinking material, allowing anglers and fly shops to customize the length of each sink tip by welding a loop in the end. The Level "T" Welding Tubing is a heat-shrink tubing that sits over a doubled-back fly line to allow for an easy welded loop to be performed. There are two sizes of tubing available, "Regular" and "Large".

The Regular tubing has an internal diameter of 1/16th of an inch and is great for T11 and smaller, while the Large tubing has an internal diameter of 3/32nds of an inch, and best for T14 and larger. Both tubes shrink to approximately 50% of their original size.

Both sizes of tube are available in two quantities: The "Pack" has 20 pieces of 6" tubing, while the "Bulk" pack contains a 50 ft coil of tubing.

To watch a video on how to weld a loop in the end of the line, go to: <https://vimeo.com/117008675>

SKU	Size	Int. Diameter	Qty
<b>Welding Tubing</b>			
RP26333	Regular Pack	.0625" (1/16th inch) 1,59 mm	20 x 6" tubes

RP26335	Large Pack	.09375" (3/32th inch) 2,38 mm	20 x 6" tubes
RP26336	Large Bulk	.09375" (3/32th inch) 2,38 mm	1 x 50ft coil

## Scandinavian Series RIO Scandi

### TECHNOLOGY:

- ConnectCore
- Extreme Slickness

### FEATURES:

- EasyID
- Front Loop
- Back Loop

## RIO Scandi

Example: 420gr  
Overall Length: 31'

### AN EASY CASTING SHOOTING HEAD DESIGNED for effortless distance and great presentation

- Easy casting design
- Printed ID system for easy size recognition
- Ultra-low stretch core for the best in casting and fishing sensitivity
- High viz rear loop

THE RIO SCANDI head is a very easy casting Scandi style shooting head, built on RIO's ultra-low stretch ConnectCore for the utmost in casting control and sensitivity. It is available in a multitude of lengths and weights to cover all rod and angling situations. For tight casting spots and the utmost in ease of casting use a head length that is between 2.5 and 3 times the length of the rod, thus a 12 ft rod would work best with a head that is between 30 and 36 ft in length. The shorter the head length, the tighter the back casting space an angler can fish in. With more room and better casting skills a longer head provides the angler with less line to strip in between each cast and more fishing time.

### Scandi Versitip Body

Example: #7 - 320gr  
Overall Length: 23'

**A VERSATILE BODY** that combines Skagit power with Scandi grace

- Multi-purpose design, casts like a Scandi or a Skagit
- Printed ID system for easy size recognition
- Loops on both ends for fast rigging

The Scandi Versitip body is a short body to which a multitude of tips can be attached – it is the most versatile design of all, and blends Skagit power with Scandi grace. It is ideal for anglers that want to travel light, yet have multiple fishing options. To the front end of the body anglers can attach regular 10 ft & 15 ft tips, MOW tips, “T” tips, iMOW tips or VersiLeaders.

For an accurate guideline of which tips match best to which body, check out the document “Making sense of RIO’s Spey Offerings” at Spey Central at [www.rioproducts.com](http://www.rioproducts.com)

## Scandinavian Series Scandi VersiTip

### TECHNOLOGY:

 ConnectCore

 Extreme Slickness

### FEATURES:

- Density Compensation (on Sink Tips Only)
- EasyID
- Front Loop
- Back Loop

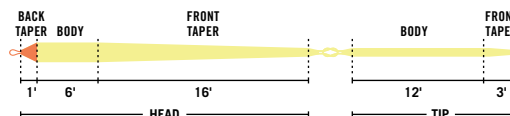

### Scandi Short VersiTip

Example: #7 – 425gr  
Overall Length: 33'

### Scandi VersiTip

Example: #7 – 445gr  
Overall Length: 38'

### AN EXTREMELY VERSATILE Scandi style head complete with a selection of interchangeable tips

- Easy casting body, complete with four tips.
- Printed ID system for easy size recognition
- Welded loops on all ends.

Two product options in this series allow anglers to perfectly tune their line system to rod length, casting ability and casting space. The **Scandi Short VersiTip** is packaged with a floating Scandi body and four, 10 ft long interchangeable tips, making it perfect for use with rods shorter than 13 ft, and for very tight casting situations. The **Scandi VersiTip** has a floating Scandi Body and 4, 15 ft long interchangeable tips, and is the best choice for when using Spey rods of 13 ft and longer. The included tips in each package are: floating, intermediate, type 3 and type 6 DC sink.

## MATCHING SINKING/FLOATING TIPS

### CHOOSING THE RIGHT TIP - SINKING OR FLOATING

There are many different types of sink tip on the market; here is a guideline of when to use which.

- The following guideline is a good place to start. However, anglers should vary their tip size and take into account fly size (heavier fly, heavier tip) and water/weather conditions.

HEAD SIZE	10ft Tip	15ft Tip	MOW/iMOW	Level "T"
Less than 300gr	-	-	Light	T-8
300 - 375gr	#5	-	Light	T-8
375 - 450gr	#6	#6	Light	T-8
450 - 500gr	#7	#7	Medium	T-11
500 - 550gr	#8	#8	Medium	T-11
550 - 575gr	#9	#9	Medium	T-11
575 - 625gr	-	#10	Heavy	T-14
625 - 700gr	-	#11	Heavy	T-14
700gr +	-	#12	Ex. Heavy	T-17

### InTouch "T" Tips

The InTouch "T" series are level, fast sinking lines that can be cut to the length and weight of an individual's preference. With no tapers these tips have the most punch at the front end, and are better for casting the biggest flies. The tips are available in T-8, T-11, T-14, T-17 and T-20 sizes. The number refers to the weight in "grains per foot". For example "T-14" weighs 14 grains per foot. The bigger the fly, and the deeper you want to go, the heavier the tip you should use.

### 15ft Sink Tips

These tips have a tapered front end that allows for a much better presentation than level tungsten ("T") tips. They are mostly available in five different densities; floating, intermediate, slow sinking (Type 3), fast sinking (Type 6) and extra fast sinking (Type 8), and have welded loops in both ends for easy attachment. 15 ft tips are available in numerous different sizes as well as densities.

### 10ft Sink Tips

These shorter version of the 15 ft tip are ideal for shorter rods, tight casting situations, or smaller rivers. They are available in four different densities; floating, intermediate, slow sinking (Type 3) and fast sinking (Type 6), and have welded loops on both ends for easy attachment. 10 ft tips are available in numerous different sizes as well as densities.

### MOW/iMOW Tips

These extraordinarily easy casting and fishing tips are perfect for Skagit heads. The majority of tips are 10 ft long, which allows for a very efficient casting stroke. As a general guideline, the length of the tip you fish, should not exceed the length of the rod, making these tips ideal for spey rods between 11 ft and 14 ft. "MOW" tips have a floating back section (if dual density), while "iMOW" tips have an intermediate back section. iMOW's tend to fish slower and deeper than MOW tips, and are generally the best choice between the two.

## Traditional Spey Series InTouch Short Head Spey

### TECHNOLOGY:

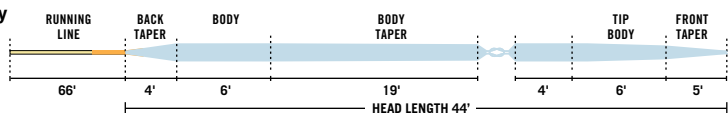

AgentX  
Extreme Slickness

### FEATURES:

→ Loading Point  
→ Front Loop

### InTouch Short Head Spey

Example: #7/8 520gr  
Overall Length: 110'

### AN EASY CASTING traditional Spey line design with a short head.

- Short head loads quickly and makes it simple to cast in tight quarters
- Rear loaded weight distribution loads rods easily for effortless casts

THE INTOUCH SHORT HEAD SPEY line from RIO is a very easy casting, traditional style interchangeable tip Spey line, which is ideal for Spey casters moving up from easier casting Scandi and Skagit heads. The head length varies between 40 ft and 50 ft, depending on line size, and it is a great choice of traditional Spey line for anglers using shorter rods and when fishing in tight quarters. The floating running line and body comes complete with a 15ft replacement tip. Anglers just need to switch this tip out with the appropriately sized sink tip to get the utmost in versatility. The line is built with RIO's ultra-low stretch ConnectCore for the very best in efficiency and load.

### FEATURES:

→ Front Loop  
→ Loading Point

### InTouch Mid Head Spey

Example: 8/9  
Overall Length: 115'

### A VERSATILE, MID BELLY LENGTH SPEY LINE that is ideal on rods of 13 to 14ft and on mid-sized rivers

- Rear weighted design loads rods easily and ensures effortless, efficient Spey casts
- Ultra-low stretch ConnectCore for maximum performance
- Mid length head for great mending and line control at distance

THE INTOUCH MID HEAD SPEY line has an easy casting mid length head, with a long "step" taper at the front that unrolls with extreme ease and efficiency. The head length is ideal for Spey rods between 13ft and 14ft in length, and for mid-sized rivers. The line is built with RIO's ultra-low stretch ConnectCore for the very best in performance, and features AgentX & Extreme Slickness technologies, as well as welded loops on both ends, and a Loading Point marker.

### InTouch Long Head Spey

Example: 8/9  
Overall Length: 115'

### DESIGNED FOR LONG two-handed rods and big rivers

- Long head length for the very best in line control and fishability
- Ultra-low stretch ConnectCore for maximum load and efficiency
- Sophisticated taper design for easy effortless distance

THE INTOUCH LONG HEAD SPEY line has been designed for bigger rivers and long two-handed and Spey rods. A series of sophisticated tapers and steps in the line design makes this one of the easiest casting long belly lines on the market, and a total joy to cast. The rear weight distribution ensures the rod loads easily, while the unique front taper design allows energy to unroll effortlessly to the fly – resulting in easy and effortless distance. The line is built with RIO's ultra-low stretch ConnectCore for the very best in efficiency and load.

### InTouch Switch

Example: #7/8  
Overall Length: 100'

**DESIGNED FOR SWITCH ROD** whether for overhead or spey casting

- Short, powerful front taper that easily casts indicators and large flies
- Long head for great mending and fly control at distance
- Unique taper that can be overhead or spey cast according to casting skill and situation

With a long head and rear taper, this line is the best choice of Switch line for anglers that want complete control of the way the line and fly fish at distance. A unique taper design ensures that casters can either overhead cast, or spey cast according to their individual skills and situation.

- ConnectCore
  - Extreme Slickness
- FEATURES:**
- 8" Front Loop
  - 8" Back Loop

**ConnectCore Shooting Line**  
 Example: .026"  
 Overall Length: 100'

- AN INCREDIBLY SENSITIVE SHOOTING LINE WITH**  
 fantastic no-tangle performance – the best shooting line ever made.
- Ultra-low stretch ConnectCore allows anglers to feel every single touch
  - Thick, highly visible handling section for durability and visibility
  - Unbelievable no-tangle casting performance

RIO'S CONNECTCORE SHOOTING LINE is the very best coated shooting line on the market with tremendous assets for the Spey fly fisher. Built on an ultra-low stretch core, it allows anglers to stay perfectly in touch with their fly throughout the swing and feel every slight touch. A thick, highly visible handling section makes it easy to grip the line, and shows when to stop stripping and make the cast. The super slick XS Technology coating floats high and shoots far.

Both ends of the shooting line have large, 8" loops neatly welded to the end to allow easy rigging. Anglers can utilize the thick handling section at the front, or keep the thinner non-orange end at the front.

SKU	Size	Handling Section	Overall Length	Sink Rate	Color

RP19048	.037"/0,94 mm - 20lb	19ft / 0.049"	100ft / 30.5m		Straw / Hot Orange

## MATCHING SHOOTING LINES

### CHOOSING THE RIGHT SHOOTING LINE

There are many different types of shooting lines on the market; here is a guideline of when to use which.

There are two types of shooting lines, thin coated floating shooting lines and hard nylon shooting lines. Hard nylon shooting lines give the maximum distance, while coated shooting lines float high and are easier to handle.

→ It is important to match the right size of shooting line to the size of the head used to ensure the longest possible flight time. The following guideline is a good place to start if you want to match a head weight to the right shooting line size. It is only a guideline, and casters can use heavier or lighter shooting lines based on personal preference.

Head Weight	ConnectCore	GripShooter	Powerflex	SlickShooter
200–400gr (12-26 g)	0,026" (0,66 mm) RP19045	25 lb RP19040	0,024" (0,60 mm) RP19030	25 lb RP20489
400–550gr (26-36 g)	0,032" (0,81 mm) RP19046	35 lb RP19041	0,030" (0,76 mm) RP19031	35 lb RP20490
550-675gr (36-44 g)	0,037" (0,93 mm) RP19047	44 lb RP19042	0,035" (0,88 mm) RP19032	44 lb RP20494
675gr + (44 g +)	0,042" (1,0 mm) RP19048	50 lb RP19043	0,040" (1,0 mm) RP19038	50 lb RP20491

### COATED FLOATING LINES

#### ConnectCore

ConnectCore shooting lines have virtually no stretch, allowing anglers to stay perfectly in touch with their fly throughout the swing and feel every slight touch. A thicker diameter handling section prolongs the life of the line and ensures it is very easy to grip the line in cold conditions, while the highly visible front section makes it very easy to see when to stop stripping and make the cast.

#### Powerflex Shooting Line

Powerflex shooting line is a coated fly line type shooting line, that floats high and has regular stretch of around 30%—which is ideal when some elasticity is required.

### HARD NYLON LINES

#### GripShooter

GripShooter is a thin, hard nylon shooting line with a unique coated handling section that is very easy to grip. The shooting line gives casters maximum distance, is light enough to hold off the water at range and allows anglers great control of their head and fly far out in the swing. The hard nylon is an oval shape that gives maximum distance and drastically reduces the amount of tangles.

#### SlickShooter

SlickShooter is a thin, hard nylon shooting line that give long distances and allows anglers to hold a lot of line off the water during the swing. It is the most economical shooting line of all. The hard nylon is an oval shape that gives maximum distance and drastically reduces the amount of tangles.

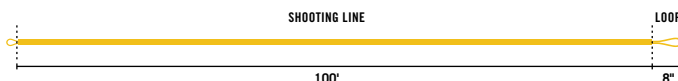

## Powerflex® Max Shooting Line

NEW!

### Powerflex Max Shooting Line

Example: .024"  
Overall Length: 100'

### A HARD, TOUGH COATED SHOOTING LINE, which excels on the shoot

- Hard, tough coated shooting line for durability and long casts
- Powerflex Core that does not wilt and tangle
- Large welded loop for fast, easy rigging

RIO'S POWERFLEX MAX SHOOTING LINE is an excellent shooting line for anglers using Skagit or Scandi style shooting heads. It features an extremely tough outer coating, over a medium stiff Powerflex core that shoots with unbelievable ease for ultra long casts, has greatly increased durability and ensures tangle-free performance, cast after cast. The line's ultra-slick coating floats high on the surface, allowing for reduced drag and making it easy to shoot. Bullet proof welded loops on each end make it fast and easy to rig, while the front loop is large enough to pass an entire shooting head coil through, for maximum speed and efficiency when rigging.

#### TECHNOLOGY:

Extreme Slickness

#### FEATURES:

- 8" Front Loop
- Back Loop

## GripShooter

### GripShooter

Example: 25lb  
Overall Length: 100'

### A HARD NYLON SHOOTING LINE WITH A UNIQUE HANDLING SECTION – the best choice for distance.

- Thick, highly visible handling section for grip, durability and visibility

RIO'S GRIPSHOOTER is based on the very popular SlickShooter, but has a thick, coated handling section that makes it very easy to grip in cold conditions. The thin nylon shooting line gives caster's the maximum distance and is light enough to hold off the water at range and allow anglers great control of their head and fly far out in the swing. A neat 8" welded loop at the front end allows for fast and efficient head changes.

#### TECHNOLOGY:

Extreme Slickness

#### FEATURES:

- 8" Front Loop

## Spey VersiLeader

Polymer Coated Tapered Leader

RIO'S SPEY VERSILEADERS are designed for the spey angler, with strong nylon cores in excess of 24 lbs and a range of different sinking (and floating) densities. They are a great addition to Spey lines and Scandinavian style heads and provide the angler with a wide range of quick-change depth options.

- Strong, nylon core in excess of 24 lbs
- A complete range of floating and sinking densities
- Slim, neat welded loop in the butt for quick rigging quick rigging

### IDEAL FOR:

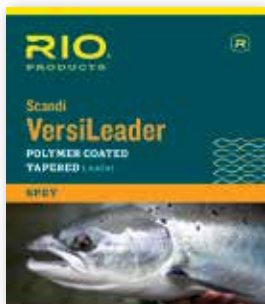

- Spey Lines
- Light Skagit Lines

## Spey Accessories Welding Tubing

RIO Welding Tubing compliments the InTouch level "T" sinking material, allowing anglers and fly shops to customize the length of each sink tip by welding a loop in the end. The Level "T" Welding Tubing is a heat-shrink tubing that sits over a doubled-back fly line to allow for an easy welded loop to be performed. There are two sizes of tubing available, "Regular" and "Large".

The Regular tubing has an internal diameter of 1/16th of an inch and is great for T11 and smaller, while the Large tubing has an internal diameter of 3/32nds of an inch, and best for T14 and larger. Both tubes shrink to approximately 50% of their original size.

Both sizes of tube are available in two quantities: The "Pack" has 20 pieces of 6" tubing, while the "Bulk" pack contains a 50 ft coil of tubing.

To watch a video on how to weld a loop in the end of the line, go to: <https://vimeo.com/117008675>

SKU	Size	Int. Diameter	Qty
<b>Welding Tubing</b>

## Tippet Rings

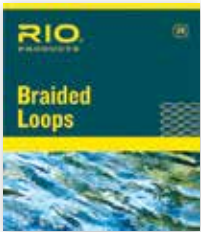

Tippet Rings are small, very strong and lightweight, and make rigging and tippet replacement fast and easy. A leader with a tippet ring turns over perfectly, and they are light enough to use when fishing dry flies. Just tie the tippet ring to a leader with a clinch knot, and then add the required tippet in the same way. Tapered leaders last longer with a tippet ring as the leader will not be shortened every time the angler replaces the tippet. Tippet rings also make it extremely easy to add droppers, and are an excellent choice for European Style Nymphing and for Indicator nymph fishing.

2 sizes – Trout, 25lb/2mm diameter and Steelhead, 45lb/3mm diameter. There are 10 Tippet Rings per pack.

SKU	Description	Strength	Size	Qty
<b>Tippet Rings - 10 Pack</b>				
RP26032	Trout Tippet Ring	25lb / 11.4kg	2mm	10 per pack
RP26033	Steelhead Tippet Ring	45lb / 20.5kg	3mm	10 per pack

## Braided Loops

A quick and easy way to put a loop on the end of a fly line.

## RIO Headcase

The ultimate shooting head case with tough 6mm storage bags arranged to allow easy viewing and flipping of heads, as well as mesh pockets for storing leaders and tippet spools. The bags are large enough to hold regular shooting heads, Skagit shooting heads and long Scandinavian shooting heads and 10 bags per case leave plenty of room for a varied selection of RIO heads. Additional storage bags can be purchased in sets of 5.

### FEATURES:

- **YKK Zipper**
- **Flip-Over Access**
- **Convenient Handle**

SKU	Description	Color
RP26052	RIO Headcase	Blue with Yellow Trim
RP26005	RIO Headcase Insert	Clear

## Shooting Head Wallet

Two sizes of shooting head wallets that are completely aerated for storing shooting heads and sink tips. The regular sized wallet is great for tips, while the Large size is perfect for shooting heads.

SKU	Description	Size	Color

RP26053	Head Wallet	Mesh Wallet for Large Shooting Heads	Blue Mesh
RP26054	Tips Wallet	Mesh Wallet for 15ft Tips	Blue Mesh

## Leader Wallet

The RIO leader wallet is perfect for storing leaders. With six pockets there is plenty of room for a selection of RIO leaders. The best leader wallet out there.

SKU	Description	Color
<b>Leader Wallet</b>		
RP26055	Leader Wallet	Blue
RP26002	Leader Wallet Insert	Clear

## Cranky Kit

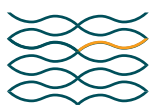

RIO's Cranky Kit is a quick, convenient fly line spooling/storage station that includes one RIO Cranky (featuring ergonomically shaped handles for a smooth, comfortable operation) and a RIO fly line spool.

With a RIO Cranky kit, anglers can change lines quickly and efficiently as fishing conditions change. Simply wind the line off the reel through the rod on to the fly line spool that is provided, unloop the line from the backing, then loop the new line to the backing and wind the new line on to the reel. With this technique anglers will not need to restring the rod.

In addition, with a few extra fly line spools, anglers can build a convenient fly line storage system and library.

SKU	Description	Color
RP26055	Cranky Kit	Clear spool with Yellow / Blue Cranky

## AgentX Line Dressing

The AgentX Line Dressing is specifically formulated to enhance the performance of modern fly lines. Treated lines will cast farther, remain clean longer and float higher than untreated lines. RIO's proprietary formulation features lubricants used in AgentX lines that keep the line slick and clean. Easy to apply. 1 oz. Bottle.

SKU	Description

RP26008	Refill bag of 50 fly line cleaning towelettes
RP26007	Fish bowl with 100 fly line cleaning towelettes

## Backing

### A HIGH QUALITY, SUPER SMOOTH BRAID that is 100% reliable

RIO's traditional Dacron® braided backing features high strength and low stretch and is unsurpassed in quality. A good compromise between thinness and the ability to make blind splice loops. It's easier to knot than other brands that are very thin but have too tight a weave for a blind splice loop.

SKU	Size	Overall Length	Color
<b>Backing</b>			
RP20500	20lb	100yds	Chartreuse
RP20510	20lb	100yds	Orange
RP20501	30lb	100yds	Chartreuse
RP20511	30lb	100yds	Orange
RP20506	20lb	200yds	Chartreuse
RP20507	30lbs	300yds	Chartreuse
RP20502	20lb	2400yds	Chartreuse
RP20508	20lb	2400yds	White
RP20512	20lb	2400yds	Orange
RP20503	30lb	2400yds	Chartreuse
RP20509	30lb	2400yds	White
RP20513	30lb	2400yds	Orange
RP20514	20lb	5000yds	White
RP20505	20lb	5000yds	Chartreuse
RP20515	30lb	5000yds	White
RP20504	30lb	5000yds	Chartreuse

## 2-Tone Gel Spun Backing

### A SUPER STRONG, ultra thin backing with no stretch

Two-tone GSP Backing: RIO's premium quality Gel Spun Backing is metered every 50 yds with a color change from Red to Yellow. The color change gives the angler a visual reference to determine how far a long running saltwater species has gone and how much line there is to be retrieved.

This universal backing is appropriate for any rod/reel size and equally suited for all species; from trout to tarpon. It is roughly the same diameter as traditional 20lb Dacron backing and reel capacity can be determined as such. Available in perfect fill amounts for every angling situation.

SKU	Size	Overall Length	Color
<b>2-Tone Gel Spun Backing</b>			
RP20527	50lb / 22.7kg	100yds / 92m	Red / Yellow
RP20528	50lb / 22.7kg	300yds / 277m	Red / Yellow
RP20529	50lb / 22.7kg	500yds / 462m	Red / Yellow
RP20537	50lb / 22.7kg	1000yds / 923m	Red / Yellow

## "RIO's Favorite Fly Fishing Knots" DVD

NEW!

RIO's Favorite Fly Fishing Knots DVD is the ultimate instructional guide to the most popular and useful fly fishing knots. Each knot is tied in thick, highly visible materials, with a contrasting background that makes it very easy to see the detail of each knot tied.

In addition, each relevant knot is tied in 10lb tippet material and then shown tested until it breaks - ending with a readout of the percentage strength of the knot. This is a fabulous resource for anglers that are concerned about using the strongest knot.

#### Fly to Leader Knots:

Clinch Knot, Belize Loop Knot, Improved Clinch Knot, Homer Rhodes Knot, Non Slip Loop Knot, Davy Knot, Trilene Knot, Pitzen Knot, Turle Knot

#### Leader to Tippet Knots:

Blood Knot, Improved Blood Knot, Double & Triple Surgeon Knot, Albright Knot, Slim Beauty Knot, Uni Knot

#### Loop Knots:

Double Surgeon Loop, Perfection Loop, Loop to Loop Connection, Bimini Twist, Spider Hitch

#### Other Knots:

Nail Knot, Needle Knot, How to use a Nail Knot Tool, How to make a Braided Loop, How to attach a Braided Loop, Reverse Blind Splice Loop, Arbor Knot, Wind Knot
